DESCRIPTION OF THE TRUST AND THE FUND

The Channel Short Duration Income Fund, formerly the FCI Bond Fund, (the “Fund”) was organized as a diversified series of Unified Series Trust (the “Trust”) on June 13, 2005. The Trust is an open-end investment company established under the laws of Ohio by an Agreement and Declaration of Trust dated October 17, 2002 (the “Trust Agreement”). The Trust Agreement permits the Board of Trustees (the “Board”) to issue an unlimited number of shares of beneficial interest of separate series without par value. The Fund is one of a series of funds currently authorized by the Board. The Fund was declared effective on September 28, 2005 and commenced operations on October 4, 2005. Currently, the investment adviser to the Fund is Channel Investment Partners LLC (the “Adviser”). From commencement of operations through July 31, 2020, the investment adviser to the Fund was Financial Counselors, Inc. (“FCI”).

Each share of a series represents an equal proportionate interest in the assets and liabilities belonging to the applicable class of the Fund and is entitled to such dividends and distributions out of income belonging to the applicable class of the Fund as are declared by the Board. Each share has the same voting and other rights and preferences as any other share of any series of the Trust for matters that affect the Trust as a whole. The Fund may offer additional classes of shares in the future.

The Fund does not issue share certificates. All shares are held in non-certificate form registered on the books of the Fund and the Fund’s transfer agent for the account of the shareholder. The shares do not have cumulative voting rights or any preemptive or conversion rights, and the Board has the authority from time to time to divide or combine the shares of any series into a greater or lesser number of shares of that series so long as the proportionate beneficial interest in the assets belonging to that series and the rights of shares of any other series are in no way affected. In case of any liquidation of a series, the holders of shares of the series being liquidated will be entitled to receive as a class a distribution out of the assets, net of the liabilities, belonging to that series. Expenses attributable to any series are borne by that series. Any general expenses of the Trust not readily identifiable as belonging to a particular series are allocated by or under the direction of the Board in such manner as the Board determines to be fair and equitable. No shareholder is liable to further calls or to assessment by the Trust without his or her express consent.

Any Trustee of the Trust may be removed by vote of the shareholders holding not less than two-thirds of the outstanding shares of the Trust. The Trust does not hold an annual meeting of shareholders. When matters are submitted to shareholders for a vote, each shareholder is entitled to one vote for each whole share he owns and fractional votes for fractional shares he owns. All shares of the Fund have equal voting rights and liquidation rights. The Trust Agreement can be amended by the Board, except that certain amendments that could adversely affect the rights of shareholders must be approved by the shareholders affected. Each share of the Fund is subject to involuntary redemption if the Board determine to liquidate the Fund. The Fund will provide notice to the shareholders if the Board determines, in its sole judgment, to liquidate the Fund, but the Fund will not be required to obtain shareholder approval prior to such liquidation. An involuntary redemption will create a capital gain or a capital loss, which may have tax consequences about which you should consult your tax adviser.

For information concerning the purchase and redemption of shares of the Fund, see “How to Buy Shares” and “How to Redeem Shares” in the Fund’s Prospectus. For a description of the methods used to determine the share price and value of the Fund’s assets, see “Determination of Net Asset Value” in the Fund’s Prospectus and this SAI.

The Fund may authorize one or more brokers or other intermediaries (an “Intermediary”) to receive on its behalf purchase and redemption orders. Such Intermediaries would be authorized to designate others to receive purchase and redemption orders on the Fund’s behalf. The Fund will be deemed to have received a purchase or redemption order when an authorized Intermediary or, if applicable, its authorized designee, receives the order.

Customer orders will be priced at the Fund’s net asset value (“NAV”) next computed after they are received by an authorized Intermediary and accepted by the Fund. The performance of the Fund may be compared in publications to the performance of various indices and investments for which reliable performance data is available. The performance of the Fund may be compared in publications to averages, performance rankings, or other information prepared by recognized mutual fund statistical services. The Fund’s annual report contains additional performance information and will be made available to investors upon request and without charge.

ADDITIONAL INFORMATION ABOUT THE FUND'S INVESTMENTS AND RISK CONSIDERATIONS

This section contains additional information regarding some of the investments the Fund may make and some of the techniques it may use.

A. Equity Securities. Equity securities include common stock and common stock equivalents (such as rights and warrants, and convertible securities). Warrants are options to purchase equity securities at a specified price valid for a specific time period. Rights are similar to warrants, but normally have a short duration and are distributed by the issuer to its shareholders.

Warrants are instruments that entitle the holder to buy underlying equity securities at a specific price for a specific period of time. A warrant tends to be more volatile than its underlying securities and ceases to have value if it is not exercised prior to its expiration date. In addition, changes in the value of a warrant do not necessarily correspond to changes in the value of its underlying securities. Rights are similar to warrants, but normally have shorter durations.

Equity securities also include exchange-traded funds ("ETFs"). ETFs include S&P Depository Receipts ("SPDRs"), Select Sector SPDRs, DIAMONDS, QQQs, iShares, HOLDRS, Fortune e-50, streetTRACKS Series Trust, Vanguard ETFs and other security baskets. For example, SPDRs are exchange-traded shares that represent ownership in the SPDR Trust, an investment company that was established to own the stocks included in the S&P 500 Index. The price and dividend yield of SPDRs track the movement of the appropriate S&P index relatively closely. DIAMONDS are similar to SPDRs, but own the securities consisting of all of the stocks of the Dow Jones Industrial Average. To the extent the Fund invests in a sector product, the Fund is subject to the risks associated with that sector. Additionally, the Fund may invest in new exchange-traded shares as they become available.

The Fund may invest in American Depositary Receipts ("ADRs"). ADRs are receipts, issued by domestic banks, for shares of a foreign-based company that entitle the holder to dividends and capital gains on the underlying security. Foreign investments can involve significant risks in addition to the risks inherent in U.S. investments. Securities of foreign companies may experience more rapid and extreme changes in value than securities of U.S. companies because a limited number of companies represent a small number of industries. Many foreign countries lack uniform accounting and disclosure standards comparable to those applicable to U.S. companies, and it may be more difficult to obtain reliable information regarding an issuer's financial condition and operations.

Investing abroad also involves different political and economic risks. Foreign investments may be affected by actions of foreign governments adverse to the interests of U.S. investors, including the possibility of expropriation or nationalization of assets, confiscatory taxation, restrictions on U.S. investment or on the ability to repatriate assets or convert currency into U.S. dollars, or other government intervention. There may be a greater possibility of default by foreign governments or foreign government-sponsored enterprises. Investments in foreign countries also involve a risk of local political, economic or social instability, military action or unrest, or adverse diplomatic developments. There is no assurance that the Adviser will be able to anticipate or counter these potential events and their impacts on the Fund's share price.

B. Debt Securities. The Fund may invest in debt securities, including debt securities that are convertible into common stocks. The Fund may invest up to 10% of its assets in lower-rated bonds that are rated below investment-grade, commonly referred to as "junk bonds" (bonds that are rated below BBB or its equivalent by any nationally recognized securities rating agency rating such bonds, or in unrated bonds that the Adviser believes are of comparable quality), and in exchange traded funds and closed-end funds that invest in these types of bonds. Debt securities rated below investment-grade are considered to have poor protection with respect to the payment of interest and repayment of principal, or may be in default. These securities are often considered to be speculative and involve greater risk of loss or price changes due to changes in the issuer's capacity to pay. The market prices of lower-rated debt securities may fluctuate more than those of higher-rated debt securities and may decline significantly in periods of general economic difficulty, which may follow periods of rising interest rates.

The market for lower-rated debt securities may be thinner and less active than that for higher-rated debt securities, which can adversely affect the prices at which the former are sold. If market quotations are not available, lower-rated debt securities will be valued in accordance with procedures established by the Board, including the use of outside pricing services. Judgment plays a greater role in valuing high-yield corporate debt securities than is the case for securities for which more external sources for quotations and last-sale information are available. Adverse publicity and changing investor perceptions may affect the ability of outside pricing services to value lower-rated debt securities and the Fund's ability to sell these securities.

Since the risk of default is higher for lower-rated debt securities, the Adviser's research and credit analysis are an especially important part of managing securities of this type held by the Fund. In considering investments for the Fund, the Adviser will attempt to identify those issuers of high-yielding debt securities whose financial condition are adequate to meet future obligations, have improved, or is expected to improve in the future. The analysis focuses on relative values based on such factors as interest or dividend coverage, asset coverage, earnings prospects, and the experience and managerial strength of the issuer.

The ratings of S&P, Moody's and other nationally recognized rating agencies represent the opinions of those rating agencies as to the quality of debt securities. It should be emphasized, however, that ratings are general and are not absolute standards of quality, and debt securities with the same maturity, interest rate and rating may have different yields, while debt securities of the same maturity and interest rate with different ratings may have the same yield.

The payment of principal and interest on most debt securities purchased by the Fund will depend upon the ability of the issuers to meet their obligations. An issuer's obligations under its debt securities are subject to the provisions of bankruptcy, insolvency, and other laws affecting the rights and remedies of creditors, such as the Federal Bankruptcy Code, and laws, if any, which may be enacted by federal or state legislatures extending the time for payment of principal or interest, or both, or imposing other constraints upon enforcement of such obligations. The power or ability of an issuer to meet its obligations for the payment of interest on, and principal of, its debt securities may be materially adversely affected by litigation or other conditions.

Subsequent to its purchase by the Fund, a rated security may cease to be rated or its rating may be reduced below the minimum rating required for purchase by the Fund. The Adviser will consider such an event in determining whether the Fund should continue to hold the security. For a more detailed description of ratings, see the Appendix.

C. Preferred Stock. Preferred stock has a preference in liquidation (and, generally dividends) over common stock but is subordinated in liquidation to debt. As a general rule the market value of preferred stocks with fixed dividend rates and no conversion rights varies inversely with interest rates and perceived credit risk, with the price determined by the dividend rate. Some preferred stocks are convertible into other securities, (for example, common stock) at a fixed price and ratio or upon the occurrence of certain events. The market price of convertible preferred stocks generally reflects an element of conversion value. Because many preferred stocks lack a fixed maturity date, these securities generally fluctuate substantially in value when interest rates change; such fluctuations often exceed those of long term bonds of the same issuer. Some preferred stocks pay an adjustable dividend that may be based on an index, formula, auction procedure or other dividend rate reset mechanism. In the absence of credit deterioration, adjustable rate preferred stocks tend to have more stable market values than fixed rate preferred stocks. All preferred stocks are also subject to the same types of credit risks of the issuer as corporate bonds. In addition, because preferred stock is junior to debt securities and other obligations of an issuer, deterioration in the credit rating of the issuer will cause greater changes in the value of a preferred stock than in a more senior debt security with similar yield characteristics. Preferred stocks may be rated by S&P and Moody's although there is no minimum rating which a preferred stock must have (and a preferred stock may not be rated) to be an eligible investment for the Fund. The Adviser expects, however, that generally the preferred stocks in which the Fund invests will be rated at least BBB by S&P or Baa by Moody's or, if unrated, of comparable quality in the opinion of the Adviser. Moody's Ratings with respect to preferred stocks do not purport to indicate the future status of payments of dividends.

D. Cash Management. The Fund may invest directly in cash, ETFs and high-quality short-term fixed-income securities. All money market instruments can change in value when interest rates or an issuer's creditworthiness change dramatically. Various short-term fixed-income securities that the Fund invest in for cash management purposes are described below:

U.S. Government Obligations. The Fund may each invest in a variety of U.S. Treasury obligations including bonds, notes and bills that mainly differ only in their interest rates, maturities and time of issuance. The Fund may also invest in other securities issued or guaranteed by the U.S. government, its agencies and instrumentalities; such as obligations of Federal Home Loan Banks, Federal Farm Credit Banks, Federal Land Banks, the Federal Housing Administration, Farmers Home Administration, Export-Import Bank of the United States, Small Business Administration, Government National Mortgage Association, Federal National Mortgage Association, General Services Administration, Central Bank for Cooperatives, Federal Home Loan Mortgage Corporation, Federal Intermediate Credit Banks, Maritime Administration, and Resolution Trust Corp. No assurance can be given that the U.S. government will provide financial support to U.S. government-sponsored agencies or instrumentalities if it is not obligated to do so by law.

Repurchase Agreements. Repurchase agreements are agreements by which the Fund purchases a security and obtains a simultaneous commitment from the seller to repurchase the security at an agreed upon price and date. The resale price is in excess of the purchase price and reflects an agreed upon market rate unrelated to the coupon rate on the purchased security. Repurchase agreements must be fully collateralized and can be entered into only with well-established banks and broker-dealers that have been deemed creditworthy by the Adviser. Repurchase transactions are intended to be short-term transactions, usually with the seller repurchasing the securities within seven days. Repurchase agreements that mature in more than seven days are subject to the Fund's limit on illiquid securities. When entering into a repurchase agreement, the Fund may lose money in the event that the other party defaults on its obligation and the Fund is delayed or prevented from disposing of the collateral. The Fund also might incur a loss if the value of the collateral declines, and it might incur costs in selling the collateral or asserting its legal rights under the agreement. If a defaulting seller filed for bankruptcy or became insolvent, disposition of collateral might be delayed pending court action.

Bank Obligations. Bank obligations include bankers' acceptances, negotiable certificates of deposit and non-negotiable time deposits, including U.S. dollar-denominated instruments issued or supported by the credit of U.S. or foreign banks or savings institutions. Although the Fund may invest in money market obligations of foreign banks or foreign branches of U.S. banks only where the Adviser determines the instrument to present minimal credit risks, such investments may nevertheless entail risks that are different from those of investments in domestic obligations of U.S. banks due to differences in political, regulatory and economic systems and conditions. All investments in bank obligations are limited to the obligations of financial institutions having more than \$1 billion in total assets at the time of purchase, and investments by the Fund in the obligations of foreign banks and foreign branches of U.S. banks will not exceed 10% of the Fund's total assets at the time of purchase. The Fund may also make interest-bearing savings deposits in commercial and savings banks in amounts not in excess of 10% of its net assets.

Commercial Paper. Investments by the Fund in commercial paper will consist of issues rated at the time of investment as A-1 and/or P-1 by S&P, Moody's or similar rating by another nationally recognized rating agency. In addition, the Fund may acquire unrated commercial paper and corporate bonds that are determined by the Adviser at the time of purchase to be of comparable quality to rated instruments that may be acquired by the Fund as previously described.

E. Derivatives. The Fund may use derivatives for any lawful purpose consistent with its investment objective.

Swaps. The Fund may enter into interest rate, credit default, securities index, commodity, or security and currency exchange rate swap agreements for any lawful purpose consistent with the Fund's investment objective, such as for the purpose of attempting to obtain, enhance, or preserve a particular desired return or spread at a lower cost to the Fund than if the Fund had invested directly in an instrument that yielded that desired return or spread. The Fund also may enter into swaps in order to protect against an increase in the price of, or the currency exchange rate applicable to, securities that the Fund anticipates purchasing at a later date. Swap agreements are two-party contracts entered into primarily by institutional investors for periods ranging from a few weeks to several years. In a standard "swap" transaction, two parties agree to exchange the returns (or differentials in rates of return) earned or realized on particular predetermined investments or instruments. The gross returns to be exchanged or "swapped" between the parties are calculated with respect to a "notional amount" (i.e., the amount or value of the underlying asset used in computing the particular interest rate, return, or other amount to be exchanged) in a particular foreign currency, or in a "basket" of securities representing a particular index. Swap agreements may include (i) interest rate caps, under which, in return for a premium, one party agrees to make payments to the other to the extent that interest rates exceed a specified rate, or "cap;" (ii) interest rate floors, under which, in return for a premium, one party agrees to make payments to the other to the extent that interest rates fall below a specified level, or "floor;" and (iii) interest rate collars, under which a party sells a cap and purchases a floor, or vice versa, in an attempt to protect itself against interest rate movements exceeding given minimum or maximum levels or "collar" amounts.

The “notional amount” of the swap agreement is the agreed upon amount or value of the underlying asset used for calculating the obligations that the parties to a swap agreement have agreed to exchange. Under most swap agreements entered into by the Fund, the obligations of the parties would be exchanged on a “net basis.” Consequently, the Fund’s obligation (or rights) under a swap agreement will generally be equal only to the net amount to be paid or received under the agreement based on the relative notional values of the positions held by each party to the agreement (“net amount”) and not the notional amount differences themselves. The Fund’s obligation under a swap agreement will be accrued daily (offset against amounts owed to the Fund) and any accrued but unpaid net amounts owed to a swap counterparty will be covered by designating liquid assets on the Fund’s books and records.

Whether the Fund’s use of swap agreements will be successful in furthering its investment objective will depend, in part, on the Adviser’s ability to predict correctly whether certain types of investments are likely to produce greater returns than other investments and the changes in the future values, indices, or rates covered by the swap agreement. Swap agreements may be considered to be illiquid. Moreover, the Fund bears the risk of loss of the amount expected to be received under a swap agreement in the event of the default or bankruptcy of a swap agreement counterparty. The Fund will enter into swap agreements only with counterparties that the Adviser reasonably believes are capable of performing under the swap agreements. If there is a default by the other party to such a transaction, the Fund will have to rely on its contractual remedies (which may be limited by bankruptcy, insolvency or similar laws) pursuant to the agreements related to the transaction. Certain restrictions imposed on the Fund by the Internal Revenue Code of 1986 (“IRC”) may limit the Fund’s ability to use swap agreements. The swaps market is largely unregulated.

Credit Derivatives. Credit derivatives are a form of derivative that are divided into two basic types, credit default swaps and total return swaps, and are usually governed by the standard ISDA Master Agreement terms and conditions. A credit default swap involves a protection buyer and a protection seller. The Fund may be either a protection buyer or seller. The protection buyer makes periodic premium payments to the protection seller during the swap term in exchange for the protection seller agreeing to make certain defined payments to the protection buyer in the event that certain defined credit events occur with respect to a particular security, issuer or basket of securities. A total return swap involves a total return receiver and a total return payor. The Fund may either be a total return receiver or payor. Generally, the total return payor sells to the total return receiver an amount equal to all cash flows and price appreciation on a defined security or asset payable at periodic times during the swap term (i.e., credit risk) in return for a periodic payment from the total return receiver based on a designated index (e.g., LIBOR) and spread plus the amount of any price depreciation on the reference security or asset. The total return payor does not need to own the underlying security or asset to enter into a total return swap. The final payment at the end of the swap term includes final settlement of the current market price of the underlying reference security or asset, and payment by the applicable party for any appreciation or depreciation in value. Usually, collateral must be posted by the total return receiver to secure the periodic interest-based and market price depreciation payments depending on the credit quality of the underlying reference security and creditworthiness of the total return receiver, and the collateral amount is marked-to-market daily equal to the market price of the underlying reference security or asset between periodic payment dates. Another type of credit derivative is the credit-linked notes and other forms of debt obligations with an embedded credit default swap component. In this type of credit derivative, payments of principal and interest are linked to the performance of one or more reference debt securities or assets. In all of these credit derivative transactions, the same general risks of derivative transactions are present, but they offer greater risks of imperfect correlation between the performance and price of the underlying reference security or asset, and the general performance of the designated interest rate or index which is the basis for the periodic payment. If the Fund writes a credit default swap, it receives a premium up front but the Fund’s exposure under the credit default swap is a form of leverage and will be subject to the restrictions on leveraged derivatives discussed above.

F. Options. An option is a contract in which the “holder” (the buyer) pays a certain amount (“premium”) to the “writer” (the seller) to obtain the right, but not the obligation, to buy from the writer (in a “call”) or sell to the writer (in a “put”) a specific asset at an agreed upon price (“strike price” or “exercise price”) at or before a certain time (“expiration date”). The holder pays the premium at inception and has no further financial obligation. The holder of an option will benefit from favorable movements in the price of the underlying asset but is not exposed to corresponding losses due to adverse movements in the value of the underlying asset. The writer of an option will receive fees or premiums but is exposed to losses due to adverse changes in the value of the underlying asset. The Fund may buy (hold) or write (sell) put and call options on assets, such as securities, currencies, financial commodities, and indices of debt and equity securities (“underlying assets”) and enter into closing transactions with respect to such options to terminate an existing position. Options used by the Fund may include European, American, and Bermuda style options. If an option is exercisable only at maturity, it is a “European” option; if it is also exercisable prior to maturity, it is an “American” option. If it is exercisable only at certain times, it is a “Bermuda” option.

The Fund may hold (buy) and write (sell) put and call options on underlying assets and enter into closing transactions with respect to such options to terminate an existing position. The purchase of a call option serves as a long hedge, and the purchase of a put option serves as a short hedge. Writing put or call options can enable the Fund to enhance income by reason of the premiums paid by the purchaser of such options. Writing call options serves as a limited short hedge because declines in the value of the hedged investment would be offset to the extent of the premium received for writing the option. However, if the security appreciates to a price higher than the exercise price of the call option, it can be expected that the option will be exercised and the Fund will be obligated to sell the security at less than its market value or will be obligated to purchase the security at a price greater than that at which the security must be sold under the option. All or a portion of any assets used as cover for OTC options written by the Fund would be considered illiquid. Writing put options serves as a limited long hedge because decreases in the value of the hedged investment would be offset to the extent of the premium received for writing the option. However, if the security depreciates to a price lower than the exercise price of the put option, it can be expected that the put option will be exercised and the Fund will be obligated to purchase the security at more than its market value.

The value of an option position will reflect, among other things, the historical price volatility of the underlying investment, the current market value of the underlying investment, the time remaining until expiration, the relationship of the exercise price to the market price of the underlying investment, and general market conditions.

The Fund may effectively terminate its right or obligation under an option by entering into a closing transaction. For example, the Fund may terminate its obligation under a call or put option that it had written by purchasing an identical call or put option; this is known as a closing purchase transaction. Conversely, the Fund may terminate a position in a put or call option it had purchased by writing an identical put or call option; this is known as a closing sale transaction. Closing transactions permit the Fund to realize the profit or limit the loss on an option position prior to its exercise or expiration.

The Fund may purchase or write both exchange-traded and OTC options. Exchange-traded options are issued by a clearing organization affiliated with the exchange on which the option is listed that, in effect, guarantees completion of every exchange-traded option transaction. In contrast, OTC options are contracts between the Fund and the other party to the transaction (“counterparty”) (usually a securities dealer or a bank) with no clearing organization guarantee. Thus, when the Fund purchases or writes an OTC option, it relies on the counterparty to make or take delivery of the underlying investment upon exercise of the option. Failure by the counterparty to do so would result in the loss of any premium paid by the Fund as well as the loss of any expected benefit of the transaction.

The Fund’s ability to establish and close out positions in exchange-listed options depends on the existence of a liquid market. The Fund intends to purchase or write only those exchange-traded options for which there appears to be a liquid secondary market. However, there can be no assurance that such a market will exist at any particular time. Closing transactions can be made for OTC options only by negotiating directly with the counterparty, or by a transaction in the secondary market if any such market exists. Although the Fund will enter into OTC options only with counterparties that are expected to be capable of entering into closing transactions with the Fund, there is no assurance that the Fund will in fact be able to close out an OTC option at a favorable price prior to expiration. In the event of insolvency of the counterparty, the Fund might be unable to close out an OTC option position at any time prior to its expiration. If the Fund were unable to effect a closing transaction for an option it had purchased, it would have to exercise the option to realize any profit.

The Fund may engage in options transactions on indices in much the same manner as the options on securities discussed above, except the index options may serve as a hedge against overall fluctuations in the securities market represented by the relevant market index.

The writing and purchasing of options is a highly specialized activity that involves investment techniques and risks different from those associated with ordinary portfolio securities transactions. Imperfect correlation between the options and securities markets may detract from the effectiveness of the attempted hedging.

G. Rule 144A Securities. The Fund may invest in Rule 144A securities that the Adviser determines to be liquid. Rule 144A allows a broader institutional trading market for securities otherwise subject to restriction on their resale to the general public. Rule 144A establishes a “safe harbor” from the registration requirements of the 1933 Act of resales of certain securities to qualified institutional buyers. Rule 144A securities are not considered to be illiquid or restricted for purposes of the Fund’s illiquid securities policy, which prohibits the Fund from investing in illiquid securities, if such securities satisfy the conditions enumerated in Rule 144A and are determined to be liquid by the Adviser in accordance with the requirements established by Board. In determining the liquidity of such securities, the Adviser will consider, among other things, the following factors: (1) the frequency of trades and quotes for the security; (2) the number of dealers and other potential purchasers or sellers of the security; (3) dealer undertakings to make a market in the security and (4) the nature of the security and of the marketplace trades (*e.g.*, the time needed to dispose of the security, the method of soliciting offers and the mechanics of the transfer).

H. Income Trusts. The Fund may invest in income trusts, including real estate investment trusts, business trusts and oil royalty trusts. Income trusts are operating businesses that have been put into a trust. They pay out the bulk of their free cash flow to unit holders. The businesses that are sold into these trusts are usually mature and stable income-producing companies that lend themselves to fixed (monthly or quarterly) distributions. These trusts are regarded as equity investments with fixed-income attributes or high-yield debt with no fixed maturity date. These trusts typically offer regular income payments and a significant premium yield compared to other types of fixed income investments.

Business Trusts. A business trust is an income trust where the principal business of the underlying corporation or other entity is in the lending, manufacturing, service or general industrial sectors. It is anticipated that the number of businesses constituted or reorganized as income trusts will increase significantly in the future. Conversion to the income trust structure is attractive to many existing mature businesses with relatively high, stable cash flows and low capital expenditure requirements, due to tax efficiency and investor demand for high-yielding equity securities. One of the primary attractions of business trusts, in addition to their relatively high yield, is their ability to enhance diversification in the portfolio as they cover a broad range of industries and geographies, including public refrigerated warehousing, shipping and transportation, mining, coal distribution, sugar distribution, forest products, retail sales, food sales and processing, chemical recovery and processing, data processing, gas marketing and check printing. Each business represented is typically characterized by long life assets or businesses that have exhibited a high degree of stability. Investments in business trusts are subject to various risks, including risks related to the underlying operating companies controlled by such trusts. These risks may include lack of or limited operating histories and increased susceptibility to interest rate risks.

Oil Royalty Trusts. A royalty trust typically controls an operating company which purchases oil and gas properties using the trust's capital. The royalty trust then receives royalties and/or interest payments from its operating company, and distributes them as income to its unit holders. Units of the royalty trust represent an economic interest in the underlying assets of the trust.

The Fund may invest in oil royalty trusts that are traded on the stock exchanges. Oil royalty trusts are income trusts that own or control oil and gas operating companies. Oil royalty trusts pay out substantially all of the cash flow they receive from the production and sale of underlying crude oil and natural gas reserves to shareholders (unitholders) in the form of monthly dividends (distributions). As a result of distributing the bulk of their cash flow to unitholders, royalty trusts are effectively precluded from internally originating new oil and gas prospects. Therefore, these royalty trusts typically grow through acquisition of producing companies or those with proven reserves of oil and gas, funded through the issuance of additional equity or, where the trust is able, additional debt. Consequently, oil royalty trusts are considered less exposed to the uncertainties faced by a traditional exploration and production corporation. However, they are still exposed to commodity risk and reserve risk, as well as operating risk.

The operations and financial condition of oil royalty trusts, and the amount of distributions or dividends paid on their securities is dependent on the oil prices. Prices for commodities vary and are determined by supply and demand factors, including weather, and general economic and political conditions. A decline in oil prices could have a substantial adverse effect on the operations and financial conditions of the trusts. Such trusts are also subject to the risk of an adverse change in the regulations of the natural resource industry and other operational risks relating to the energy sector. In addition, the underlying operating companies held or controlled by the trusts are usually involved in oil exploration; however, such companies may not be successful in holding, discovering, or exploiting adequate commercial quantities of oil, the failure of which will adversely affect their values. Even if successful, oil and gas prices have fluctuated widely during the most recent years and may continue to do so in the future. The Adviser expects that the combination of global demand growth and depleting reserves, together with current geopolitical instability, will continue to support strong crude oil prices over the long term. However, there is no guarantee that these prices will not decline. Declining crude oil prices may cause the Fund to incur losses on its investments. In addition, the demand in and supply to the developing markets could be affected by other factors such as restrictions on imports, increased taxation, and creation of government monopolies, as well as social, economic and political uncertainty and instability. Furthermore, there is no guarantee that non-conventional sources of natural gas will not be discovered which would adversely affect the oil industry.

Moreover, as the underlying oil and gas reserves are produced the remaining reserves attributable to the royalty trust are depleted. The ability of a royalty trust to replace reserves is therefore fundamental to its ability to maintain distribution levels and unit prices over time. Certain royalty trusts have demonstrated consistent positive reserve growth year-over-year and, as such, certain royalty trusts have been successful to date in this respect and are thus currently trading at unit prices significantly higher than those of five or ten years ago. Oil royalty trusts manage reserve depletion through reserve additions resulting from internal capital development activities and through acquisitions.

When the Fund invests in foreign oil royalty trusts, it will also be subject to foreign securities risks which are more fully described herein.

Real Estate Investment Trusts. The Fund may invest in real estate investment trusts (“REITs”). A REIT is a corporation or business trust that invests substantially all of its assets in interests in real estate. Equity REITs are those which purchase or lease land and buildings and generate income primarily from rental income. Equity REITs may also realize capital gains (or losses) when selling property that has appreciated (or depreciated) in value. Equity REITs will be treated as equity securities for purposes of calculating the percentage of the Fund’s assets invested in equity securities. Mortgage REITs are those which invest in real estate mortgages and generate income primarily from interest payments on mortgage loans. Hybrid REITs generally invest in both real property and mortgages. Mortgage REITs and hybrid REITs (which invest in mortgages and real property) will be treated as fixed income securities for purposes of calculating the percentage of the Fund’s assets invested in fixed income securities.

REITs generally are subject to risks associated with direct ownership of real estate, such as decreases in real estate values or fluctuations in rental income caused by a variety of factors, including increases in interest rates, increases in property taxes and other operating costs, casualty or condemnation losses, possible environmental liabilities and changes in supply and demand for properties. Risks associated with REIT investments include the fact that equity and mortgage REITs are dependent upon specialized management skills and are not fully diversified. These characteristics subject REITs to the risks associated with financing a limited number of projects. They are also subject to heavy cash flow dependency, defaults by borrowers and self-liquidation. Additionally, equity REITs may be affected by any changes in the value of the underlying properties they own, and mortgage REITs may be affected by the quality of any credit extended.

I. Shares of Other Investment Companies. The Fund may invest in shares of other investment companies (including money market funds, exchange-traded funds, closed-end funds or other mutual funds). To the extent the Fund invests in securities of other investment companies, Fund shareholders would indirectly pay a portion of the operating costs of such companies. These costs include management, brokerage, shareholder servicing and other operational expenses. Indirectly, then, shareholders may incur higher expenses than if they owned the underlying investment companies directly because they will bear not only the proportionate share of the expenses of the Fund, but also, indirectly, the proportionate share of the expenses of the underlying investment companies. Shareholders may also incur increased transaction costs as a result of the Fund’s portfolio turnover rate and/or because of the high portfolio turnover rates in the underlying funds. The Fund is not required to hold securities for any minimum period and, as a result, the Fund may incur short-term redemption fees and increased trading costs. When selecting underlying funds for investment, the Fund will not be precluded from investing in an underlying fund with a higher than average expense ratio. The Fund is independent from any of the underlying funds in which it invests and it has no voice in or control over the investment strategies, policies or decisions of the underlying funds. The Fund’s only option is to liquidate its investment in an underlying fund in the event of dissatisfaction with the fund.

The structure of a closed-end fund poses additional risks than are involved when investing in most mutual funds. For example, most closed-end funds leverage a higher percentage of their assets (that is, using borrowed money to buy additional assets). Leveraging can provide higher yields and potentially higher returns for closed-end fund investors, but it also increases overall risk and the volatility of the investment. Unlike mutual funds, closed-end fund shares generally are not redeemable. Closed-end funds generally sell a fixed number of shares at one time (in the initial public offering), after which the shares typically trade on a secondary market, such as the New York Stock Exchange (the “NYSE”) or the Nasdaq Stock Market. A closed-end fund is not required to buy its shares back from investors upon request. By comparison, mutual funds issue securities redeemable at NAV at the option of the shareholder and typically engage in a continuous offering of their shares. If a closed-end fund’s underlying market falls and the fund’s discount increases or its premium decreases, the price return of the closed-end fund — the actual return to the shareholder — will be less than the fund’s NAV return. Most closed-end funds trade actively, and their shares are liquid. Some closed-end funds, however, trade less actively, and may not be very liquid. The market price of a closed-end fund’s shares may also be affected by its dividend or distribution levels (which are dependent, in part, on expenses), stability of dividends or distributions, general market and economic conditions and other factors beyond the control of a closed-end fund. The foregoing factors may result in the market price of the shares of the closed-end fund being greater than, less than or equal to NAV.

The Fund may invest in business development companies (“BDCs”), a special type of closed-end investment company that tends to invest in small, developing, financially troubled, and often private companies. BDCs make available significant managerial assistance to those portfolio companies. BDCs are not required to register as investment companies under the Investment Company Act of 1940. They are, however, required to register their securities under the Securities Exchange Act of 1934.

J. Exchange Traded Notes. The Fund may invest in exchange-traded notes (“ETNs”), which are a type of unsecured, unsubordinated debt security. ETNs combine certain aspects of bonds and ETFs. Similar to ETFs, ETNs are traded on a major exchange (e.g., NYSE) during normal trading hours. However, investors can also hold the ETN until maturity. At maturity, the issuer pays to the investor a cash amount equal to principal amount, subject to the day’s index factor. ETN returns are based upon the performance of a market index minus applicable fees. ETNs do not make periodic coupon payments and provide no principal protection. The value of an ETN may be influenced by time to maturity, level of supply and demand for the ETN, volatility and lack of liquidity in underlying commodities markets, changes in the applicable interest rates, changes in the issuer’s credit rating and economic, legal, political or geographic events that affect the referenced commodity. The value of the ETN may drop due to a downgrade in the issuer’s credit rating, despite the underlying index remaining unchanged.

K. Asset-Backed Securities. Asset-backed securities (“ABS”) are collateralized by pools of automobile loans, educational loans, home equity loans, credit card receivables, equipment or automobile leases, commercial mortgage-backed securities (“MBS”), utilities receivables, secured or unsecured bonds issued by corporate or sovereign obligors, unsecured loans made to a variety of corporate commercial and industrial loan customers of one or more lending banks, or a combination of these bonds and loans. ABS are “pass through” securities, meaning that principal and interest payments made by the borrower on the underlying assets are passed through to the ABS holder. ABS are issued through special purpose vehicles that are bankruptcy remote from the issuer of the collateral. ABS are subject to interest rate risk and prepayment risk. Some ABS may receive prepayments that can change their effective maturities. Issuers of ABS may have limited ability to enforce the security interest in the underlying assets or may have no security in the underlying assets, and credit enhancements provided to support the securities, if any, may be inadequate to protect investors in the event of default. In addition, ABS may experience losses on the underlying assets as a result of certain rights provided to consumer debtors under federal and state law. The value of ABS may be affected by the factors described above and other factors, such as the availability of information concerning the pool and its structure, the creditworthiness of the servicing agent for the pool, the originator of the underlying assets or the entities providing credit enhancements and the ability of the servicer to service the underlying collateral. The value of ABS representing interests in a pool of utilities receivables may be adversely affected by changes in government regulations. While certain ABS may be insured as to the payment of principal and interest, this insurance does not protect the market value of such obligations or the Fund’s net asset value. The value of an insured security will be affected by the credit standing of its insurer.

Collateralized debt obligations (“CDOs”) and collateralized loan obligations (“CLOs”) are types of ABS that are backed solely by a pool of other debt securities. CDOs and CLOs are typically issued in various classes with varying priorities. The risks of an investment in a CDO or CLO depend largely on the type of the collateral securities and the class of the CDO or CLO in which the Fund invests. In addition to interest rate, prepayment, default and other risks of ABS and fixed income securities, in general, CDOs and CLOs are subject to additional risks, including the possibility that distributions from collateral securities will not be adequate to make interest or other payments, the quality of the collateral may decline in value or default, the Fund may invest in CDOs or CLOs that are subordinate to other classes, and the complex structure may produce disputes with the issuer or unexpected investment results. The Fund's investment in CDOs and CLOs may decrease in market value if they experience loan defaults or credit impairment, the disappearance of a subordinate tranche or class of debt, or due to market anticipation of defaults and investor aversion to the securities as a class.

L. Mortgage-Backed Securities. MBS are “pass through” securities, meaning that a pro rata share of regular interest and principal payments, as well as unscheduled early prepayments, on the underlying mortgage pool is passed through monthly to the holder. MBS may include conventional mortgage pass through securities, participation interests in pools of adjustable and fixed rate mortgage loans, stripped securities (described herein), floating rate mortgage-backed securities and certain classes of multiple class CMOs. MBS pay principal to the holder over their term, which differs from other forms of debt securities that normally provide for principal payment at maturity or specified call dates. MBS are subject to the general risks associated with investing in real estate securities; that is, they may lose value if the value of the underlying real estate to which a pool of mortgages relates declines. In addition, investments in MBS involve certain specific risks, including the failure of a party to meet its commitments under the related operative documents, adverse interest rate changes, and the effects of prepayments on mortgage cash flows and that any guarantee or other structural feature, if present, is insufficient to enable the timely payment of interest and principal on the MBS. Although certain MBS are guaranteed as to timely payment of interest and principal by a government-sponsored enterprise, the market price for such securities is not guaranteed and will fluctuate. Certain MBS may be purchased on a when-issued basis subject to certain limitations and requirements.

There are currently four types of MBS: (1) those issued by the U.S. Government or one of its agencies or instrumentalities, such as the Government National Mortgage Association (“GNMA”), the Federal National Mortgage Association (“FNMA”) and the Federal Home Loan Mortgage Corporation (“FHLMC”); (2) those issued by private issuers that represent an interest in or are collateralized by pass through securities issued or guaranteed by the U.S. Government or one of its agencies or instrumentalities; (3) those issued by the U.S. Government or one of its agencies or instrumentalities without a government guarantee, such as credit risk transfer bonds; and (4) those issued by private issuers that represent an interest in or are collateralized by whole mortgage loans or pass through securities without a government guarantee but that usually have some form of private credit enhancement. Privately issued MBS are structured similar to GNMA, FNMA and FHLMC MBS, and are issued by originators or and investors in mortgage loans, including depository institutions mortgage banks and special purpose subsidiaries of the foregoing.

M. Loans. Loans may be primary, direct investments or investments in loan assignments or participation interests. A loan assignment represents a portion or the entirety of a loan and a portion of the entirety of a position previously attributable to a different lender. The purchaser of an assignment typically succeeds to all the rights and obligations under the loan agreement and has the same rights and obligations as the assigning investor. However, assignments through private negotiations may cause the purchaser of an assignment to have different and more limited rights than those held by the assigning investor. Loan participation interests are interests issued by a lender or other entity and represent a fractional interest in a loan. The Fund typically will have a contractual relationship only with the financial institution that issued the participation interest. As a result, the Fund may have the right to receive payments of principal, interest and any fees to which it is entitled only from the financial institution and only upon receipt by such entity of such payments from the borrower. In connection with purchasing a participation interest, the Fund generally will have no right to enforce compliance by the borrower with the terms of the loan agreement, nor any rights with respect to any funds acquired by other investors through set-off against the borrower and the Fund may not directly benefit from the collateral supporting the loan in which it has purchased the participation interest. As a result, the Fund may assume the credit risk of both the borrower and the financial institution issuing the participation interest. In the event of the insolvency of the entity issuing a participation interest, the Fund may be treated as a general creditor of such entity.

Loans may be originated by a lending agent, such as a financial institution or other entity, on behalf of a group or “syndicate” of loan investors (the “Loan Investors”). In such a case, the agent administers the terms of the loan agreement and is responsible for the collection of principal, and interest payments from the borrower and the apportionment of these payments to the Loan Investors. Failure by the agent to fulfill its obligations may delay or adversely affect receipt of payment by the Fund. Furthermore, unless under the terms of a loan agreement or participation (as applicable) the Fund has direct recourse against the borrower, the Fund must rely on the Agent and the other Loan Investors to pursue appropriate remedies against the borrower.

Loan investments may be made at par or at a discount or premium to par. The interest payable on a loan may be fixed or floating rate, and paid in cash or in-kind. In connection with transactions in loans, the Fund may be subject to facility or other fees. Loans may be secured by specific collateral or other assets of the borrower, guaranteed by a third party, unsecured or subordinated. During the term of a loan, the value of any collateral securing the loan may decline in value, causing the loan to be under collateralized. Collateral may consist of assets that may not be readily liquidated, and there is no assurance that the liquidation of such assets would satisfy fully a borrower’s obligations under the loan. In addition, if a loan is foreclosed, the Fund could become part owner of the collateral and would bear the costs and liabilities associated with owning and disposing of such collateral.

A lender's repayment and other rights primarily are determined by governing loan, assignment or participation documents, which (among other things) typically establish the priority of payment on the loan relative to other indebtedness and obligations of the borrower. A borrower typically is required to comply with certain covenants contained in a loan agreement between the borrower and the holders of the loan. The types of covenants included in loan agreements generally vary depending on market conditions, the creditworthiness of the issuer, and the nature of the collateral securing the loan. Loans with fewer covenants that restrict activities of the borrower may provide the borrower with more flexibility to take actions that may be detrimental to the loan holders and provide fewer investor protections in the event covenants are breached. The Fund may experience relatively greater realized or unrealized losses or delays and expense in enforcing its rights with respect to loans with fewer restrictive covenants. Loans to entities located outside of the U.S. (including to sovereign entities) may have substantially different lender protections and covenants as compared to loans to U.S. entities and may involve greater risks. In the event of bankruptcy, applicable law may impact a lender's ability to enforce its rights. The Fund may have difficulties and incur expense enforcing its rights with respect to non-U.S. loans and such loans could be subject to bankruptcy laws that are materially different than in the U.S. Sovereign entities may be unable or unwilling to meet their obligations under a loan due to budgetary limitations or economic or political changes within the country.

Investing in loans involves the risk of default by the borrower or other party obligated to repay the loan. In the event of insolvency of the borrower or other obligated party, the Fund may be treated as a general creditor of such entity unless it has rights that are senior to that of other creditors or secured by specific collateral or assets of the borrower. Fixed-rate loans are also subject to the risk that their value will decline in a rising interest rate environment. This risk is mitigated for floating-rate loans, where the interest rate payable on the loan resets periodically by reference to a base lending rate. The base lending rate usually is the London Interbank Offered Rate ("LIBOR"), the Federal Reserve federal funds rate, the prime rate or other base lending rates used by commercial lenders. LIBOR usually is an average of the interest rates quoted by several designated banks as the rates at which they pay interest to major depositors in the London interbank market on U.S. dollar-denominated deposits.

Many financial instruments use or may use a floating rate based on LIBOR, which is the offered rate for short-term Eurodollar deposits between major international banks. On July 27, 2017, the head of the United Kingdom's Financial Conduct Authority announced a desire to phase out the use of LIBOR by the end of 2021. Due to this announcement, there remains uncertainty regarding the future utilization of LIBOR and the nature of any replacement rate. As such, the potential effect of a transition away from LIBOR on the Fund or the financial instruments in which the Fund invests cannot yet be determined. See "LIBOR Transition and Associated Risk" herein.

The Fund will take whatever action it considers appropriate in the event of anticipated financial difficulties, default or bankruptcy of the borrower or other entity obligated to repay a loan. Such action may include: (i) retaining the services of various persons or firms (including affiliates of the investment adviser) to evaluate or protect any collateral or other assets securing the loan or acquired as a result of any such event; (ii) managing (or engaging other persons to manage) or otherwise dealing with any collateral or other assets so acquired; and (iii) taking such other actions (including, but not limited to, payment of operating or similar expenses relating to the collateral) as the investment adviser may deem appropriate to reduce the likelihood or severity of loss on the Fund's investment and/or maximize the return on such investment. The Fund will incur additional expenditures in taking protective action with respect to loans in (or anticipated to be in) default and assets securing such loans. In certain circumstances, the Fund may receive equity or equity-like securities from a borrower to settle the loan or may acquire an equity interest in the borrower. Representatives of the Fund also may join creditor or similar committees relating to loans.

Lenders can be sued by other creditors and the debtor and its shareholders. Losses could be greater than the original loan amount and occur years after the loan's recovery. If a borrower becomes involved in bankruptcy proceedings, a court may invalidate the Fund's security interest in any loan collateral or subordinate the Fund's rights under the loan agreement to the interests of the borrower's unsecured creditors or cause interest previously paid to be refunded to the borrower. There are also other events, such as the failure to perfect a security interest due to faulty documentation or faulty official filings, which could lead to the invalidation of the Fund's security interest in loan collateral. If any of these events occur, the Fund's performance could be negatively affected.

Interests in loans generally are not listed on any national securities exchange or automated quotation system and no active market may exist for many loans, making them illiquid. As described below, a secondary market exists for many Senior Loans, but it may be subject to irregular trading activity, wide bid/ask spreads and extended trade settlement periods.

From time to time the investment adviser and its affiliates may borrow money from various banks in connection with their business activities. Such banks may also sell interests in loans to or acquire them from the Fund or may be intermediate participants with respect to loans in which the Fund owns interests. Such banks may also act as agents for loans held by the Fund.

To the extent that legislation or state or federal regulators that regulate certain financial institutions impose additional requirements or restrictions with respect to the ability of such institutions to make loans, particularly in connection with highly leveraged transactions, the availability of loans for investment may be adversely affected. Further, such legislation or regulation could depress the market value of loans.

N. Municipal Securities.

Municipal Lease Obligations. Municipal lease obligations (“MLOs”) MLO are bonds that are secured by lease payments made by the party, typically a state or municipality, leasing the facilities (e.g., schools or office buildings) that were financed by the bond. Such lease payments may be subject to annual appropriation or may be made only from revenues associated with the facility financed. In other cases, the leasing state or municipality is obligated to appropriate funds from its general tax revenues to make lease payments as long as it utilizes the leased property. MLOs, like other municipal debt obligations, are subject to the risk of non-payment. Although MLOs do not constitute general obligations of the issuer for which the issuer’s unlimited taxing power is pledged, a lease obligation is frequently backed by the issuer’s covenant to budget for, appropriate and make the payments due under the lease obligation. However, certain lease obligations contain “non-appropriation” clauses, which provide that the issuer has no obligation to make lease or installment purchase payments in future years unless money is appropriated for such purpose on a yearly basis. Although “non-appropriation” lease obligations may be secured by the leased property, disposition of the property in the event of foreclosure might prove difficult. A certificate of participation (also referred to as a “participation”) in a municipal lease is an instrument evidencing a pro rata share in a specific pledged revenue stream, usually lease payments by the issuer that are typically subject to annual appropriation. The certificate generally entitles the holder to receive a share, or participation, in the payments from a particular project.

MLOs and participations therein represent a type of financing that may not have the depth of marketability associated with more conventional securities and, as such, they may be less liquid than conventional securities. Certain MLOs may be deemed illiquid for the purpose of the Fund’s limitation on investments in illiquid securities, unless determined by the investment adviser, pursuant to guidelines adopted by the Board, to be liquid securities. The investment adviser will consider an MLO to be liquid if it is rated investment grade (being an MLO rated BBB or Baa or higher) by a nationally recognized statistical ratings organization or is insured by an insurer rated investment grade. If an MLO or participation does not meet the foregoing criteria, then the investment adviser will consider the MLO to be illiquid unless it conducts an analysis of relevant factors and concludes that the MLO is liquid. In conducting such an analysis, the investment adviser will consider the factors it believes are relevant to the marketability of the obligation, to the extent that information regarding such factor is available to the investment adviser and pertinent to the liquidity determination, which may include: (1) the willingness of dealers to bid for the obligation; (2) the number of dealers willing to purchase or sell the obligation and the number of other potential buyers; (3) the frequency of trades and quotes for the obligation; (4) the nature of the marketplace trades, including the time needed to dispose of the obligation, the method of soliciting offers, and the mechanics of transfer; (5) the willingness of the governmental issuer to continue to appropriate funds for the payment of the obligation; (6) how likely or remote an event of non-appropriation may be, which depends in varying degrees on a variety of factors, including those relating to the general creditworthiness of the governmental issuer, its dependence on its continuing access to the credit markets, and the importance to the issuer of the equipment, property or facility covered by the lease or contract; (7) an assessment of the likelihood that the lease may or may not be cancelled; and (8) other factors and information unique to the obligation in determining its liquidity.

The ability of issuers of MLOs to make timely lease payments may be adversely impacted in general economic downturns and as relative governmental cost burdens are allocated and reallocated among federal, state and local governmental units. Such non-payment would result in a reduction of income from and value of the obligation. Issuers of MLOs might seek protection under the bankruptcy laws. In the event of bankruptcy of such an issuer, holders of MLOs could experience delays and limitations with respect to the collection of principal and interest on such MLOs and may not, in all circumstances, be able to collect all principal and interest to which it is entitled. To enforce its rights in the event of a default in lease payments, the Fund might take possession of and manage the assets securing the issuer’s obligations on such securities or otherwise incur costs to protect its rights, which may increase the Fund’s operating expenses and adversely affect the net asset value of the Fund. When the lease contains a non-appropriation clause, however, the failure to pay would not be a default and the Fund would not have the right to take possession of the assets. Any income derived from the Fund’s ownership or operation of such assets may not be tax-exempt.

Municipal Obligations. Municipal obligations include debt obligations issued to obtain funds for various public purposes, including the construction of a wide range of public facilities, refunding of outstanding obligations and obtaining funds for general operating expenses and loans to other public institutions and facilities. Certain types of bonds are issued by or on behalf of public authorities to finance various privately owned or operated facilities, including certain facilities for the local furnishing of electric energy or gas, sewage facilities, solid waste disposal facilities and other specialized facilities. Municipal obligations include bonds as well as tax-exempt commercial paper, project notes and municipal notes such as tax, revenue and bond anticipation notes of short maturity, generally less than three years. While most municipal bonds pay a fixed rate of interest semiannually in cash, there are exceptions. Some bonds pay no periodic cash interest, but rather make a single payment at maturity representing both principal and interest. Some bonds may pay interest at a variable or floating rate. Bonds may be issued or subsequently offered with interest coupons materially greater or less than those then prevailing, with price adjustments reflecting such deviation. Municipal obligations also include trust certificates representing interests in municipal securities held by a trustee. The trust certificates may evidence ownership of future interest payments, principal payments or both on the underlying securities.

In general, there are three categories of municipal obligations, the interest on which is exempt from federal income tax and is not a tax preference item for purposes of the AMT: (i) certain “public purpose” obligations (whenever issued), which include obligations issued directly by state and local governments or their agencies to fulfill essential governmental functions; (ii) certain obligations issued before August 8, 1986 for the benefit of non-governmental persons or entities; and (iii) certain “private activity bonds” issued after August 7, 1986, which include “qualified Section 501(c)(3) bonds” or refundings of certain obligations included in the second category. Opinions relating to the validity of municipal bonds, exclusion of municipal bond interest from an investor’s gross income for federal income tax purposes and, where applicable, state and local income tax, are rendered by bond counsel to the issuing authorities at the time of issuance.

Interest on certain “private activity bonds” issued after August 7, 1986 is exempt from regular federal income tax, but such interest (including a distribution by the Fund derived from such interest) is treated as a tax preference item that could subject the recipient to or increase the recipient’s liability for the AMT.

The two principal classifications of municipal bonds are “general obligation” and “revenue” bonds. Issuers of general obligation bonds include states, counties, cities, towns and regional districts. The proceeds of these obligations are used to fund a wide range of public projects, including the construction or improvement of schools, highways and roads, water and sewer systems and a variety of other public purposes. The basic security of general obligation bonds is the issuer’s pledge of its faith, credit, and taxing power for the payment of principal and interest. The taxes that can be levied for the payment of debt service may be limited or unlimited as to rate and amount.

Typically, the only security for a limited obligation or revenue bond is the net revenue derived from a particular facility or class of facilities financed thereby or, in some cases, from the proceeds of a special tax or other special revenues. Revenue bonds have been issued to fund a wide variety of revenue-producing public capital projects including: electric, gas, water and sewer systems; highways, bridges and tunnels; port and airport facilities; colleges and universities; hospitals; and convention, recreational, tribal gaming and housing facilities. Although the security behind these bonds varies widely, many lower rated bonds provide additional security in the form of a debt service reserve fund that may also be used to make principal and interest payments on the issuer's obligations. In addition, some revenue obligations (as well as general obligations) are insured by a bond insurance company or backed by a letter of credit issued by a banking institution. Revenue bonds also include, for example, pollution control, health care and housing bonds, which, although nominally issued by municipal authorities, are generally not secured by the taxing power of the municipality but by the revenues of the authority derived from payments by the private entity that owns or operates the facility financed with the proceeds of the bonds. Obligations of housing finance authorities have a wide range of security features, including reserve funds and insured or subsidized mortgages, as well as the net revenues from housing or other public projects. Many of these bonds do not generally constitute the pledge of the credit of the issuer of such bonds. The credit quality of such revenue bonds is usually directly related to the credit standing of the user of the facility being financed or of an institution which provides a guarantee, letter of credit or other credit enhancement for the bond issue. The Fund may on occasion acquire revenue bonds that carry warrants or similar rights covering equity securities. Such warrants or rights may be held indefinitely, but if exercised, the Fund anticipates that it would, under normal circumstances, dispose of any equity securities so acquired within a reasonable period of time. Investing in revenue bonds may involve (without limitation) the following risks.

Hospital bond ratings are often based on feasibility studies that contain projections of expenses, revenues and occupancy levels. A hospital’s income available to service its debt may be influenced by demand for hospital services, management capabilities, the service area economy, efforts by insurers and government agencies to limit rates and expenses, competition, availability and expense of malpractice insurance, and Medicaid and Medicare funding.

Education-related bonds are comprised of two types: (i) those issued to finance projects for public and private colleges and universities, charter schools and private schools, and (ii) those representing pooled interests in student loans. Bonds issued to supply educational institutions with funding are subject to many risks, including the risks of unanticipated revenue decline, primarily the result of decreasing student enrollment, decreasing state and federal funding, or changes in general economic conditions. Additionally, higher than anticipated costs associated with salaries, utilities, insurance or other general expenses could impair the ability of a borrower to make annual debt service payments. Student loan revenue bonds are generally offered by state (or sub-state) authorities or commissions and are backed by pools of student loans. Underlying student loans may be guaranteed by state guarantee agencies and may be subject to reimbursement by the United States Department of Education through its guaranteed student loan program. Others may be private, uninsured loans made to parents or students that may be supported by reserves or other forms of credit enhancement. Cash flows supporting student loan revenue bonds are impacted by numerous factors, including the rate of student loan defaults, seasoning of the loan portfolio, and student repayment deferral periods of forbearance. Other risks associated with student loan revenue bonds include potential changes in federal legislation regarding student loan revenue bonds, state guarantee agency reimbursement and continued federal interest and other program subsidies currently in effect.

Transportation debt may be issued to finance the construction of airports, toll roads, highways, or other transit facilities. Airport bonds are dependent on the economic conditions of the airport's service area and may be affected by the business strategies and fortunes of specific airlines. They may also be subject to competition from other airports and modes of transportation. Air traffic generally follows broader economic trends and is also affected by the price and availability of fuel. Toll road bonds are also affected by the cost and availability of fuel as well as toll levels, the presence of competing roads and the general economic health of an area. Fuel costs, transportation taxes and fees, and availability of fuel also affect other transportation-related securities, as do the presence of alternate forms of transportation, such as public transportation.

Industrial development bonds ("IDBs") are normally secured only by the revenues from the project and not by state or local government tax payments, they are subject to a wide variety of risks, many of which relate to the nature of the specific project. Generally, IDBs are sensitive to the risk of a slowdown in the economy.

Electric utilities face problems in financing large construction programs in an inflationary period, cost increases and delay occasioned by safety and environmental considerations (particularly with respect to nuclear facilities), difficulty in obtaining fuel at reasonable prices, and in achieving timely and adequate rate relief from regulatory commissions, effects of energy conservation and limitations on the capacity of the capital market to absorb utility debt.

Water and sewer revenue bonds are generally secured by the fees charged to each user of the service. The issuers of water and sewer revenue bonds generally enjoy a monopoly status and latitude in their ability to raise rates. However, lack of water supply due to insufficient rain, run-off, or snow pack can be a concern and has led to past defaults. Further, public resistance to rate increases, declining numbers of customers in a particular locale, costly environmental litigation, and federal environmental mandates are challenges faced by issuers of water and sewer bonds.

The obligations of any person or entity to pay the principal of and interest on a municipal obligation are subject to the provisions of bankruptcy, insolvency and other laws affecting the rights and remedies of creditors, such as the Federal Bankruptcy Act, and laws, if any, that may be enacted by Congress or state legislatures extending the time for payment of principal or interest, or both, or imposing other constraints upon enforcement of such obligations. Certain bond structures may be subject to the risk that a taxing authority may issue an adverse ruling regarding tax-exempt status. There is also the possibility that as a result of adverse economic conditions (including unforeseen financial events, natural disasters and other conditions that may affect an issuer's ability to pay its obligations), litigation or other conditions, the power or ability of any person or entity to pay when due principal of and interest on a municipal obligation may be materially affected or interest and principal previously paid may be required to be refunded. There have been instances of defaults and bankruptcies involving municipal obligations that were not foreseen by the financial and investment communities. The Fund will take whatever action it considers appropriate in the event of anticipated financial difficulties, default or bankruptcy of either the issuer of any municipal obligation or of the underlying source of funds for debt service. Such action may include: (i) retaining the services of various persons or firms (including affiliates of the investment adviser) to evaluate or protect any real estate, facilities or other assets securing any such obligation or acquired by the Fund as a result of any such event; (ii) managing (or engaging other persons to manage) or otherwise dealing with any real estate, facilities or other assets so acquired; and (iii) taking such other actions as the adviser (including, but not limited to, payment of operating or similar expenses of the underlying project) may deem appropriate to reduce the likelihood or severity of loss on the fund's investment. The Fund will incur additional expenditures in taking protective action with respect to portfolio obligations in (or anticipated to be in) default and assets securing such obligations.

Historically, municipal bankruptcies have been rare and certain provisions of the U.S. Bankruptcy Code governing such bankruptcy are unclear. Further, the application of state law to municipal obligation issuers could produce varying results among the states or among municipal obligation issuers within a state. These uncertainties could have a significant impact on the prices of the municipal obligations in which the Fund invests. There could be economic, business or political developments or court decisions that adversely affect all municipal obligations in the same sector. Developments such as changes in healthcare regulations, environmental considerations related to construction, construction cost increases and labor problems, failure of healthcare facilities to maintain adequate occupancy levels, and inflation can affect municipal obligations in the same sector. As the similarity in issuers of municipal obligations held by the Fund increases, the potential for fluctuations in the Fund's share price also may increase.

The Commonwealth of Puerto Rico and its related issuers continue to experience financial difficulties, including persistent government budget deficits, underfunded public pension benefit obligations, underfunded government retirement systems, sizable debt service obligations and a high unemployment rate. Several rating agencies have downgraded a number of securities issued in Puerto Rico to below investment-grade, and numerous issuers have entered Title III of the Puerto Rico Oversight, Management and Economic Stability Act (“PROMESA”), which is similar to bankruptcy protection, through which the Commonwealth of Puerto Rico can restructure its debt. However, Puerto Rico's case is the first ever heard under PROMESA and there is no existing case precedent to guide the proceedings. Accordingly, Puerto Rico's debt restructuring process could take significantly longer than traditional municipal bankruptcy proceedings. Further, it is not clear whether a debt restructuring process will ultimately be approved or, if so, the extent to which it will apply to Puerto Rico municipal securities sold by an issuer other than the territory. A debt restructuring could reduce the principal amount due, the interest rate, the maturity, and other terms of Puerto Rico municipal securities, which could adversely affect the value of Puerto Rican municipal securities. Puerto Rico's short-term financial difficulties continue to be further impacted by the 2017 hurricane, and Puerto Rico has faced significant out-migration relating to its economic difficulties, eroding its population, economic base and ultimate ability to support its current debt burden, creating further long-term uncertainty.

The secondary market for some municipal obligations issued within a state (including issues that are privately placed with the Fund) is less liquid than that for taxable debt obligations or other more widely traded municipal obligations. No established resale market exists for certain of the municipal obligations in which the Fund may invest. The market for obligations rated below investment grade is also likely to be less liquid than the market for higher rated obligations. As a result, the Fund may be unable to dispose of these municipal obligations at times when it would otherwise wish to do so at the prices at which they are valued.

Municipal obligations that are rated below investment grade but that, subsequent to the assignment of such rating, are backed by escrow accounts containing U.S. Government obligations may be determined by the investment adviser to be of investment grade quality for purposes of the Fund's investment policies. In the case of a defaulted obligation, the Fund may incur additional expense seeking recovery of its investment. Defaulted obligations are denoted in the “Schedule of Investments” in the “Financial Statements” included in the Fund's reports to shareholders.

The yields on municipal obligations depend on a variety of factors, including purposes of the issue and source of funds for repayment, general money market conditions, general conditions of the municipal bond market, size of a particular offering, maturity of the obligation and rating of the issue. The ratings of Moody's, S&P and Fitch represent their opinions as to the quality of the municipal obligations which they undertake to rate, and in the case of insurers, other factors including the claims-paying ability of such insurer. It should be emphasized, however, that ratings are based on judgment and are not absolute standards of quality. Consequently, municipal obligations with the same maturity, coupon and rating may have different yields while obligations of the same maturity and coupon with different ratings may have the same yield. In addition, the market price of such obligations will normally fluctuate with changes in interest rates, and therefore the net asset value of the Fund will be affected by such changes.

O. Trust Certificates. Trust certificates are investments in a limited purpose trust or other vehicle formed under state law. Trust certificates in turn invest in instruments, such as credit default swaps, interest rate swaps, preferred securities and other securities, in order to customize the risk/return profile of a particular security. Like an investment in a bond, investments in trust certificates represent the right to receive periodic income payments (in the form of distributions) and payment of principal at the end of the term of the certificate. However, these payments are conditioned on the trust's receipt of payments from, and the trust's potential obligations to, the counterparties to the derivative instruments and other securities in which the trust invests. Investments in these instruments are indirectly subject to the risks associated with derivative instruments, including, among others, credit risk, default or similar event risk, counterparty risk, interest rate risk, leverage risk and management risk. It is expected that the trusts that issue credit-linked trust certificates will constitute “private” investment companies, exempt from registration under the 1940 Act. Although the trusts are typically private investment companies, they are generally not actively managed. It is also expected that the certificates will be exempt from registration under the 1933 Act. Accordingly, there may be no established trading market for the certificates and they may constitute illiquid investments.

INVESTMENT LIMITATIONS

A. Fundamental. The investment limitations described below have been adopted by the Trust with respect to the Fund and are fundamental (*i.e.*, they may not be changed without the affirmative vote of a majority of the outstanding shares of the Fund). As used in the Prospectus and this SAI, the term “majority of the outstanding shares of the Fund” means the lesser of: (1) 67% or more of the outstanding shares of the Fund present at a meeting, if the holders of more than 50% of the outstanding shares of the Fund are present or represented at such meeting; or (2) more than 50% of the outstanding shares of the Fund.

1. Borrowing Money. The Fund will not borrow money, except (a) from a bank, provided that immediately after such borrowing there is an asset coverage of 300% for all borrowings of the Fund; or (b) from a bank or other persons for temporary purposes only, provided that such temporary borrowings are in an amount not exceeding 5% of the Fund’s total assets at the time when the borrowing is made. This limitation does not preclude the Fund from entering into reverse repurchase transactions, provided that the Fund has an asset coverage of 300% for all borrowings and repurchase commitments of the Fund pursuant to reverse repurchase transactions.

2. Senior Securities. The Fund will not issue senior securities. This limitation is not applicable to activities that may be deemed to involve the issuance or sale of a senior security by the Fund, provided that the Fund’s engagement in such activities is consistent with or permitted by the Investment Company Act of 1940, as amended (the “1940 Act”), the rules and regulations promulgated thereunder or interpretations of the U.S. Securities and Exchange Commission (the “SEC”) or its staff.

3. Underwriting. The Fund will not act as underwriter of securities issued by other persons. This limitation is not applicable to the extent that, in connection with the disposition of portfolio securities (including restricted securities), the Fund may be deemed an underwriter under certain federal securities laws.

4. Real Estate. The Fund will not purchase or sell real estate. This limitation is not applicable to investments in marketable securities which are secured by or represent interests in real estate. This limitation does not preclude the Fund from investing in mortgage-related securities or investing in companies engaged in the real estate business or that have a significant portion of their assets in real estate (including real estate investment trusts).

5. Commodities. The Fund will not purchase or sell commodities unless acquired as a result of ownership of securities or other investments. This limitation does not preclude the Fund from purchasing or selling options or futures contracts, from investing in securities or other instruments backed by commodities, or from investing in companies which are engaged in a commodities business or have a significant portion of their assets in commodities.

6. Loans. The Fund will not make loans to other persons, except (a) by loaning portfolio securities, (b) by engaging in repurchase agreements, or (c) by purchasing nonpublicly offered debt securities. For purposes of this limitation, the term “loans” shall not include the purchase of a portion of an issue of publicly distributed bonds, debentures or other securities.

7. Concentration. The Fund will not invest 25% or more of its total assets in a particular industry. This limitation is not applicable to investments in obligations issued or guaranteed by the U.S. government, its agencies and instrumentalities or repurchase agreements with respect thereto.

8. Diversification. With respect to 75% of its total assets, the Fund will not purchase securities issued by any one issuer (other than cash, cash items, or securities issued or guaranteed by the government of the United States or its agencies or instrumentalities) if, as a result at the time of such purchase, more than 5% of the value of its total assets would be invested in the securities of that issuer, or if it would own more than 10% of the outstanding voting securities of that issuer.

With respect to the percentages adopted by the Trust as maximum limitations on the Fund’s investment policies and limitations, an excess above the fixed percentage will not be a violation of the policy or limitation unless the excess results immediately and directly from the acquisition of any security or the action taken. This paragraph does not apply to the borrowing policy set forth in paragraph 1 above.

Notwithstanding any of the foregoing limitations, any investment company, whether organized as a trust, association or corporation, or a personal holding company, may be merged or consolidated with or acquired by the Trust, provided that if such merger, consolidation or acquisition results in an investment in the securities of any issuer prohibited by said paragraphs, the Trust shall, within ninety days after the consummation of such merger, consolidation or acquisition, dispose of all of the securities of such issuer so acquired or such portion thereof as shall bring the total investment therein within the limitations imposed by said paragraphs above as of the date of consummation.

B. Non-Fundamental. The following limitations have been adopted by the Trust for the Fund and are non-fundamental (i.e., they are other investment practices that may be changed by the Board without the approval of shareholders to the extent permitted by applicable law, regulation or regulatory policy).

1. Pledging. The Fund will not mortgage, pledge, hypothecate or in any manner transfer, as security for indebtedness, any assets of the Fund except as may be necessary in connection with borrowings described in Fundamental limitation (1) above. Margin deposits, security interests, liens and collateral arrangements with respect to transactions involving options, futures contracts, short sales and other permitted investments and techniques are not deemed to be a mortgage, pledge or hypothecation of assets for purposes of this limitation.

2. Borrowing. The Fund will not purchase any security while borrowings (including reverse repurchase agreements) representing more than 5% of its total assets are outstanding.

3. Margin Purchases. The Fund will not purchase securities or evidences of interest thereon on “margin.” This limitation is not applicable to short-term credit obtained by the Fund for the clearance of purchases and sales or redemption of securities, or to arrangements with respect to transactions involving options, futures contracts, short sales and other permitted investments and techniques.

4. Loans of Portfolio Securities. The Fund will not make loans of portfolio securities.

5. SEC Name Rule. Under normal circumstances, the Fund will invest at least 80% of its net assets (plus any borrowings for investment purposes) in fixed income securities. The Fund may meet its objective by directly investing in the applicable securities, or by investing in other investment companies (including exchange-traded funds) that invest primarily in such securities. The Fund may not change this policy except upon at least 60 days prior written notice to shareholders.

INVESTMENT ADVISER

Channel Investment Partners LLC, located at 4601 N. Fairfax Drive, Ste. 1200, Arlington, VA 22203, serves as Adviser to the Fund. Matthew Duch is the President and Managing Partner, and sole owner, of the Adviser. The Adviser was formed in August 2019 and registered with the Securities and Exchange Commission in April 2020.

Under the terms of the management agreement (the “Agreement”), the Adviser manages the Fund’s investments subject to approval of the Board. As compensation for its management services, the Fund is obligated to pay the Adviser a fee computed and accrued daily and paid monthly at an annual rate of 0.40% of the average daily net assets of the Fund. The Adviser has contractually agreed to waive its fee and, to the extent necessary, reimburse certain of the Fund’s operating expenses, but only to the extent necessary so that the Fund’s net expenses, excluding portfolio transaction and other investment-related costs (including brokerage fees and commissions); taxes; borrowing costs (such as interest and dividend expenses on securities sold short); acquired fund fees and expenses; fees and expenses associated with investments in other collective investment vehicles or derivative instruments (including for example option and swap fees and expenses); any amounts payable pursuant to a distribution or service plan adopted in accordance with Rule 12b-1 under the Investment Company Act of 1940; any administrative and/or shareholder servicing fees payable pursuant to a plan adopted by the Board of Trustees; expenses incurred in connection with any merger or reorganization; extraordinary expenses (such as litigation expenses, indemnification of Trust officers and Trustees and contractual indemnification of Fund service providers); and other expenses that the Trustees agree have not been incurred in the ordinary course of the Fund’s business, do not exceed 0.95% of the average daily net assets of the Fund. The contractual arrangement is in place through January 31, 2022. Each waiver/expense payment by the Adviser is subject to recoupment by the Adviser from the Fund in the three years following the date the particular waiver/expense payment occurred, but only if such recoupment can be achieved without exceeding the annual expense limitation in effect at the time of the waiver/expense payment and any expense limitation in effect at the time of the recoupment. Prior to August 1, 2020 FCI managed the Fund. As of September 30, 2019, FCI was entitled to seek repayment of investment advisory fees waived and expense reimbursements in the amount of \$105,757 from the Fund no later than September 30, 2022. The Adviser is entitled to recoup from the Fund fees waived and expenses reimbursed by FCI in the three years following the date the particular waiver/expense payment occurred, but only if such recoupment can be achieved without exceeding the annual expense limitation in effect at the time of the waiver/expense payment and any expense limitation in effect at the time of the recoupment.

The following table describes the advisory fees paid to FCI by the Fund during the fiscal years indicated:

Fiscal Year Ended	Advisory Fees Accrued	Total Fees Waived and/or Expenses Reimbursed (Recouped)	Net Advisory Fees Paid (Reimbursed)
September 30, 2017	\$156,652	\$31,432	\$125,220
September 30, 2018	\$150,509	\$39,712	\$110,797
September 30, 2019	\$145,502	\$34,613	\$110,889

A discussion of the factors that the Board considered in approving the Fund’s management agreement will be included in the Fund’s annual report to shareholders for the period ended September 30, 2020.

The Adviser may make payments to banks or other financial institutions that provide shareholder services and administer shareholder accounts. If a bank or other financial institution were prohibited from continuing to perform all or a part of such services, management of the Fund believes that there would be no material impact on the Fund or its shareholders. Banks and other financial institutions may charge their customers fees for offering these services to the extent permitted by applicable regulatory authorities, and the overall return to those shareholders availing themselves of these services may be lower than to those shareholders who do not. The Fund may from time to time purchase securities issued by banks and other financial institutions which provide such services; however, in selecting investments for the Fund, no preference will be shown for such securities.

About the Portfolio Manager

Matthew Duch (the “Portfolio Manager”) is the portfolio manager responsible for the day-to-day management of the Fund and has ultimate decision-making authority related to investments made by the Fund. As of August 1, 2020, the Portfolio Manager was responsible for the management of the following types of accounts, in addition to the Fund:

MATTHEW DUCH				
Type of Account	Number of Other Accounts Managed	Total Assets in Other Accounts Managed (millions)	Number of Accounts Managed with Performance- Based Advisory Fee	Total Assets with Performance- Based Advisory Fee (millions)
Registered Investment Companies:	0	\$0	0	\$0
Other Pooled Investment Vehicles:	0	\$0	0	\$0
Other Accounts:	0	\$0	0	\$0

The Portfolio Manager is compensated for his services by the Adviser. The Portfolio Manager’s compensation consists of monies available after Adviser operations, commissions, capital expenditures, contracts, taxes, etc. are paid. Compensation is aligned with the Adviser’s goal of growing assets under management to reduce fees, efficient and cost effective operations, competitive performance and meeting other shareholder objectives.

To the extent that the Fund and another of the Adviser’s clients seek to acquire the same security at about the same time, the Fund may not be able to acquire as large a position in such security as it desires or it may have to pay a higher price for the security. Similarly, the Fund may not be able to obtain as large an execution of an order to sell or as high a price for any particular portfolio security if the other client desires to sell the same portfolio security at the same time. On the other hand, if the same securities are bought or sold at the same time by more than one client, the resulting participation in volume transactions could produce better executions for the Fund. In the event that more than one client wants to purchase or sell the same security on a given date, the purchases and sales will normally be made by random client selection.

The Portfolio Manager's ownership of shares of the Fund as of August 1, 2020 appears in the table below.

Portfolio Manager	Dollar Range of Fund Shares
Matthew Duch	NONE

TRUSTEES AND OFFICERS

GENERAL QUALIFICATIONS. The Board supervises the business activities of the Trust. Each Trustee serves as a trustee until termination of the Trust unless the Trustee dies, resigns, retires, or is removed. All of the Trustees are "Independent Trustees," which means that they are not "interested persons" (as defined in the 1940 Act) of the Trust or any adviser, sub-adviser or distributor of the Trust.

The following table provides information regarding the Independent Trustees.

Name, Address*, (Year of Birth), Position with Trust**, Term of Position with Trust	Principal Occupation During Past 5 Years and Other Directorships
Kenneth G.Y. Grant (1949) Chairman, January 2017 to present; Independent Trustee, May 2008 to present	Current: Director, Standpoint Multi-Asset (Cayman) Fund, Ltd. (2019 – present); Director, Advisors Charitable Gift Fund (2020 - present), a Donor Advised Fund. Previous: EVP, Benefit Plans Administrative Services, Inc., provider of retirement benefit plans administration (2019 – 2020); Director, Northeast Retirement Services (NRS) LLC, a transfer agent and fund administrator; and Director, Global Trust Company (GTC), a non-depository trust company sponsoring private investment product (2003 – 2019); EVP, NRS (2003 – 2019); GTC, EVP (2008 – 2019); EVP, Savings Banks Retirement Association (2003 – 2019), provider of qualified retirement benefit plans.
Daniel J. Condon (1950) Chairman of the Audit Committee; Chairman of the Governance & Nominating Committee; Independent Trustee, December 2002 to present	Current: Retired (2017 - present) Previous: Executive Advisor of Standard Steel LLC, a Railway manufacturing supply company (2016); Chief Executive Officer of Standard Steel LLC (2011 - 2015); Director of Standard Steel Holdings Co., which owns Standard Steel LLC (2011 - 2016); Director of International Crankshaft Inc. (2004 - 2016).
Gary E. Hippenstiel (1947) Chairman of the Pricing & Liquidity Committee; Independent Trustee, December 2002 to present	Current: President and founder of Hippenstiel Investment Counsel LLC ("Hippenstiel") since 2008. Hippenstiel was registered as an investment adviser from 2008 to December 31, 2019.
Stephen A. Little (1946) Independent Trustee, December 2002 to present; Chairman, December 2004 to December 2016	Current: President and founder of The Rose, Inc., a registered investment adviser, since 1993.
Ronald C. Tritschler (1952) Independent Trustee, January 2007 to present; Interested Trustee, December 2002 to December 2006	Current: Chief Executive Officer, Director and Legal Counsel of The Webb Companies, a national real estate company, since 2001; Director, Standpoint Multi-Asset (Cayman) Fund, Ltd. (2020 – present).

* The address for each Trustee is 225 Pictoria Drive, Suite 450, Cincinnati, Ohio 45246.

** As of the date of this SAI, the Trust consists of, and each Trustee oversees, 24 series.

The following table provides information regarding the Officers of the Trust.

Name, Address*, (Year of Birth), Position with Trust, Term of Position with Trust	Principal Occupation During Past 5 Years
David R. Carson (1958) President, January 2016 to present	Current: Vice President and Director of Client Strategies of Ultimus Fund Solutions, LLC, since 2013.
Mark J. Seger (1962) Vice President, August 2017 to present	Current: Vice Chairman Ultimus Fund Solutions, LLC, since 2019. Previous: Ultimus Fund Solutions, LLC, President (1999 – 2018) and Co-CEO (2018 - 2019).
Zachary P. Richmond (1980) Treasurer and Chief Financial Officer, November 2014 to present	Current: Vice President, Director of Financial Administration for Ultimus Fund Solutions, LLC, since 2019. Previous: Assistant Vice President, Associate Director of Financial Administration for Ultimus Fund Solutions, LLC (2015 - 2019); Manager, Fund Administration, Huntington Asset Services, Inc. (2011 - 2015).
Martin R. Dean (1963) Assistant Chief Compliance Officer, January 2016 to present	Current: Vice President, Director of Fund Compliance of Ultimus Fund Solutions, LLC, since 2016. Previous: Senior Vice President and Compliance Group Manager, Huntington Asset Services, Inc. (2013 - 2015).
Stacey A. Havens (1965) Relationship Manager, November 2009 to present	Current: Assistant Vice President, Relationship Management for Ultimus Fund Solutions, LLC, since 2015. Previous: Vice President, Relationship Management, Huntington Asset Services, Inc. (1993 - 2015).
Elisabeth A. Dahl (1962) Secretary, May 2017 to present; Assistant Secretary, March 2016 to May 2017	Current: Attorney, Ultimus Fund Solutions, LLC, since March 2016. Previous: Attorney, Cincinnati, OH (2009 - 2016).
Carolyn E. Ford (1956) Assistant Secretary, March 2017 to present	Current: Paralegal, Ultimus Fund Solutions, LLC since March 2017. Previous: Fiscal Officer Hamilton County Ohio (2012 to 2017).
Stephen L. Preston (1966) AML Compliance Officer, May 2017 to present	Current: Vice President and Chief Compliance Officer, Ultimus Fund Solutions, LLC and Ultimus Fund Distributors, LLC, since 2011.
Lynn E. Wood (1946) Chief Compliance Officer, October 2004 to present	Current: Managing Member, Buttonwood Compliance Partners, LLC, since 2013.

* The business address for each officer is 225 Pictoria Drive, Suite 450, Cincinnati, Ohio 45246.

In addition to the information provided above, below is a summary of the specific experience, qualifications, attributes or skills of each Trustee and the reason why he or she was selected to serve as Trustee:

Stephen A. Little – Mr. Little has been an Independent Trustee of the Trust since its inception in 2002. He previously served as trustee to three other registered investment companies. In 1993, he founded an investment advisory firm that provides discretionary investment advice and advice on socially responsible investing. Mr. Little previously held NASD Series 6, 7, and 22 licenses. Mr. Little received a B.A. from Wabash College and a M. Div. from Christian Theological Seminary. Prior to completing his education, Mr. Little served in the U.S. Marine Corps. Mr. Little was selected to serve as Trustee of the Trust based primarily on his experience in the investment management industry.

Gary E. Hippenstiel – Mr. Hippenstiel has served as a mutual fund trustee since 1995. He has been an Independent Trustee of the Trust since its inception in 2002, and he currently serves as Chairman of the Pricing & Liquidity Committee of the Board. He previously served as a trustee to three other registered investment companies and a variable insurance trust. In 2008, Mr. Hippenstiel founded an investment consulting firm and he also has served as Chairman of the investment committee for two family foundations. Prior to that, he served as Chief Investment Officer of Legacy Trust Company for 17 years, where he was responsible for establishing investment strategies and selecting and monitoring independent managers of trust accounts. Mr. Hippenstiel received a B.S. in Business Administration and an M.B.A. in Finance from the University of California, Berkeley. Mr. Hippenstiel was selected as Trustee based primarily on his experience in the investment management industry.

Daniel J. Condon – Mr. Condon has been an Independent Trustee of the Trust since its inception in 2002 and currently serves as Chairman of the Audit Committee and the Governance & Nominating Committee of the Board. He has also served as trustee of three other registered investment companies. From 1990 to 2002, he served as Vice President and General Manager of an international automotive equipment manufacturing company. From 2002 to 2017 he served as CEO of various multi-national companies. Mr. Condon received a B.S. in Mechanical Engineering from Illinois Institute of Technology and an M.B.A. from Eastern Illinois University. He also received his registered Professional Engineer license. Mr. Condon was selected as Trustee based on his over 22 years of international business experience.

Ronald C. Tritschler – Mr. Tritschler has been a Trustee of the Trust since its inception in 2002. He also has served as trustee of three other registered investment companies. Since 1989, he has been a director, vice president and general counsel of a company that operates convenience stores. Since 2001, Mr. Tritschler has been CEO, director and general counsel of a national real estate company. He also is a director of a bank holding company. Mr. Tritschler has been a Director of Standpoint Multi-Asset (Cayman) Fund, Ltd. Since 2020. Mr. Tritschler received a B.A. in Business Administration from Baldwin-Wallace College and his J.D. and M.B.A. from the University of Toledo. Mr. Tritschler was selected to serve as a Trustee based primarily on his substantial business and legal experience.

Kenneth G.Y. Grant – Mr. Grant, an Independent Trustee of the Trust since 2008, currently serves as Chairman of the Board. Mr. Grant has over 40 years of executive leadership experience, founding and leading multiple financial services firms. Previously, he was an Executive Vice President of a retirement benefit plan administrator, and a Director, Executive Vice President and Chief Officer Corporate Development for a trust company that sponsors private investment product. He was also a Director, Executive Vice President and Chief Officer Corporate Development for a firm administering more than US\$1 trillion in global pension, endowment, corporate, public and other commingled assets. He was also an Executive Vice President of a retirement association serving multiple employers. Mr. Grant is a member of the Presbytery of Boston, Presbyterian Church (USA), Chair of the Investment Committee of the Massachusetts Council of Churches and previously a member of the Board, Lift Up Africa. Mr. Grant has been a Director of Standpoint Multi-Asset (Cayman) Fund, Ltd. Since 2019. He has a B.A. in Psychology from Syracuse University, a ThM in Theology and Ethics from Boston University and a M.B.A. from Clark University. Mr. Grant was selected to serve as a Trustee based primarily on his experience in investment and trust product development and administration, and financial service and retirement plan management.

Independent Trustees Messrs, Hippenstiel, Tritschler, Condon, and Little each have previous experience serving as trustees to other multi-series trusts, which means that they are familiar with issues relating to overseeing multiple advisers and multiple funds. Messrs. Hippenstiel, Little, and Grant have experience conducting due diligence on and evaluating investment advisers – Mr. Hippenstiel as the Chief Investment Officer of Legacy Trust, Mr. Little as the President of a registered investment adviser, and Mr. Grant as an officer of a trust company which sponsors collective investment trusts and manages limited liability investment corporations. This means that they are qualified to review annually each adviser's qualifications, including the qualification of the Adviser to serve as adviser to the Fund.

RISK MANAGEMENT. As part of its efforts to oversee risk management associated with the Trust, the Board has established the Audit Committee, the Pricing & Liquidity Committee, and the Governance & Nominating Committee as described below:

- The Audit Committee consists of Messrs. Condon, Little and Tritschler. The Audit Committee is responsible for overseeing the Trust's accounting and financial reporting policies and practices, internal controls and, as appropriate, the internal controls of certain service providers; overseeing the quality and objectivity of financial statements and the independent audits of the financial statements; and acting as a liaison between the independent auditors and the full Board. The Audit Committee met four times during the year ended December 31, 2019.
- The Pricing & Liquidity Committee is responsible for reviewing and approving fair valuation determinations. The Pricing & Liquidity Committee currently consists of Messrs. Grant, Hippenstiel, and Little, except that any one member of the Pricing & Liquidity Committee constitutes a quorum for purposes of reviewing and approving a fair value. In addition to meetings to approve fair valuations, the Pricing & Liquidity Committee met four times during the year ended December 31, 2019.
- The Governance & Nominating Committee currently consists of all of the Trustees. The Governance & Nominating Committee is responsible for overseeing the composition of the Board and qualifications and independence of its members, compensation, education and other governance matters, as well as succession of Board members. The Committee was formed in May 2019 and met two times during the year ended December 31, 2019.

The Audit Committee and the Pricing & Liquidity Committee meet at least quarterly, and each Committee reviews reports provided by administrative service providers, legal counsel and independent accountants. The Governance & Nominating Committee meets on an as needed basis. All Committees report directly to the full Board.

The Independent Trustees have engaged independent legal counsel to provide advice on regulatory, compliance and other topics. This legal counsel also serves as counsel to the Trust. In addition, the Board has engaged on behalf of the Trust a full-time Chief Compliance Officer (“CCO”) who is responsible for overseeing compliance risks. He reports to the Board at least quarterly any material compliance items that have arisen, and annually he provides to the Board a comprehensive compliance report outlining the effectiveness of compliance policies and procedures of the Trust and its service providers. As part of the CCO’s risk oversight function, the CCO seeks to understand the risks inherent in the operations of the Trust’s series and their advisers and sub- advisers. Periodically the CCO provides reports to the Board that:

- Assess the quality of the information the CCO receives from internal and external sources;
- Assess how Trust personnel monitor and evaluate risks;
- Assess the quality of the Trust’s risk management procedures and the effectiveness of the Trust’s organizational structure in implementing those procedures;
- Consider feedback from and provide feedback regarding critical risk issues to Trust and administrative and advisory personnel responsible for implementing risk management programs; and
- Consider economic, industry, and regulatory developments, and recommend changes to the Trust’s compliance programs as necessary to meet new regulations or industry developments.

The Trustees meet in-person on a quarterly basis, typically for two days of meetings. Trustees also participate in special meetings and conference calls as needed. In addition to Board meetings, Trustees also participate in teleconferences each quarter to review and discuss 15(c) materials and other information. Legal counsel to the Trust provides quarterly reports to the Board regarding regulatory developments. On a quarterly basis, the Trustees review and discuss some or all of the following compliance and risk management reports relating to the series of the Trust:

- (1) Fund Performance/Morningstar Report/Portfolio Manager’s Commentary
- (2) Code of Ethics review
- (3) NAV Errors, if any
- (4) Distributor Compliance Reports
- (5) Timeliness of SEC Filings
- (6) Dividends and other Distributions
- (7) List of Brokers, Brokerage Commissions Paid and Average Commission Rate
- (8) Review of 12b-1 Payments
- (9) Multiple Class Expense Reports
- (10)Anti-Money Laundering/Customer Identification Reports
- (11)Administrator and CCO Compliance Reports
- (12)Market Timing Reports

The Board has not adopted a formal diversity policy. When soliciting future nominees for Trustee, the Board will make efforts to identify and solicit qualified minorities and women.

On an annual basis, the Trustees assess the Board’s and their individual effectiveness in overseeing the Trust. Based upon its assessment, the Board determines whether additional risk assessment or monitoring processes are required with respect to the Trust or any of its service providers.

Based on the qualifications of each of the Trust's Trustees and officers, the risk management practices adopted by the Board, including a regular review of several compliance and operational reports, and the committee structure adopted by the Board, the Trust believes that its leadership is appropriate.

The following table provides information regarding shares of the Fund and other portfolios of the Trust owned by each Trustee as of December 31, 2019.

Trustee	Dollar Range of the Fund's Shares	Aggregate Dollar Range of Shares of All Funds Within the Trust*
Kenneth Grant	None	\$10,001 - \$50,000
Daniel J. Condon	None	None
Gary Hippenstiel	None	None
Stephen Little	None	\$1 - \$10,000
Ronald C. Tritschler	None	None

* As of the date of this SAI, the Trust consists of 24 series.

Set forth below is the compensation paid during the last fiscal year to the Trustees and compensated officers by the Fund on an individual basis and by the Trust on an aggregate basis. Trustees' and officers' fees and expenses are Trust expenses and the Fund incurs its share of such expenses, which are allocated among the series of the Trust in such manner as the Trustees determine to be fair and equitable.

Name and Position	Aggregate Compensation from the Fund	Pension or Retirement Benefits Accrued As Part of Fund Expenses	Estimated Annual Benefits Upon Retirement	Total Compensation from Trust¹
Kenneth G.Y. Grant, Independent Trustee and Chairman of the Board	\$ 2,520	\$ 0	\$ 0	\$ 56,745
Daniel J. Condon, Independent Trustee and current Chairman of the Audit Committee and the Governance & Nominating Committee	\$ 2,070	\$ 0	\$ 0	\$ 46,720
Gary E. Hippenstiel, Independent Trustee and Chairman of the Pricing & Liquidity Committee	\$ 2,520	\$ 0	\$ 0	\$ 56,845
Nancy V. Kelly, Former Independent Trustee and Chairman of the Audit Committee and the Governance & Nominating Committee	\$ 2,520	\$ 0	\$ 0	\$ 56,845
Stephen A. Little, Independent Trustee	\$ 2,070	\$ 0	\$ 0	\$ 46,720
Ronald C. Tritschler, Independent Trustee	\$ 2,070	\$ 0	\$ 0	\$ 46,720
Lynn E. Wood, Chief Compliance Officer	\$ 8,500	\$ 0	\$ 0	\$ 132,8012

¹ As of the date of this SAI, the Trust consists of 24 series.

² In addition to the CCO's salary listed in the table, the Trust accrues amounts to pay for the CCO's expenses relating to compliance activities, including due diligence reviews of advisers to the series of the Trust, attendance at compliance seminars, etc. These expenses are allocated to each series of the Trust in such manner as the Trustees determine to be fair and equitable.

CONTROL PERSONS AND PRINCIPAL HOLDERS OF SECURITIES

A principal shareholder is any person who owns (either of record or beneficially) 5% or more of the outstanding shares of a fund. A person who beneficially owns, either directly or indirectly, more than 25% of the voting securities of a fund is presumed to be a control person of the fund. As a controlling shareholder, each of these persons could control the outcome of any proposal submitted to the shareholders for approval, including changes to the Fund's fundamental policies or the terms of the management agreement with the Adviser.

As of September 1, 2020, the following person was a principal shareholder of the Fund and may be deemed to be a control person of the Fund:

Name and Address	% Ownership	Type of Ownership
Midwest Trust Company 5901 College Blvd., Suite 100 Overland Park, KS 66211	96.57%	Record

As of September 1, 2020, the Trustees and Officers as a group owned less than 1% of the Fund.

PORTFOLIO TURNOVER

The Fund may sell portfolio securities without regard to the length of time they have been held when, in the opinion of the Adviser, investment considerations warrant such action. The Fund's portfolio turnover rate is the percentage of its portfolio that is bought and sold to exchange for other securities and is expressed as a percentage of its total assets. A high rate of portfolio turnover (100% or more) generally leads to higher transaction costs and may result in a greater number of taxable transactions. For the fiscal year ended September 30, 2019, the Fund's portfolio turnover rate was 18%.

ANTI-MONEY LAUNDERING COMPLIANCE PROGRAM

Customer identification and verification is part of the Fund's overall obligation to prevent money laundering under federal law. The Trust has, on behalf of the Fund, adopted an anti-money laundering compliance program designed to prevent the Fund from being used for money laundering or financing of terrorist activities (the "AML Compliance Program"). The Trust has delegated the responsibility to implement the AML Compliance Program to the Fund's transfer agent, Ultimus Fund Solutions, LLC, ("Ultimus") subject to oversight by the Trust's Chief Compliance Officer and, ultimately, by the Board.

When you open an account with the Fund, the Fund's transfer agent will request that you provide your name, physical address, date of birth, and Social Security number or tax identification number. You may also be asked for other information that, in the transfer agent's discretion, will allow the Fund to verify your identity. Entities are also required to provide additional documentation. This information will be verified to ensure the identity of all persons opening an account with the Fund. The Fund reserves the right to (i) refuse, cancel or rescind any purchase or exchange order, (ii) freeze any account and/or suspend account activities, or (iii) involuntarily redeem your account in cases of threatening conduct or suspected fraudulent or illegal activity. These actions will be taken when, in the sole discretion of the Fund's transfer agent, they are deemed to be in the best interest of the Fund, or in cases where the Fund is requested or compelled to do so by governmental or law enforcement authority.

PORTFOLIO TRANSACTIONS AND BROKERAGE

Subject to policies established by the Board, the Adviser is responsible for the Fund's portfolio decisions and the placing of the Fund's portfolio transactions. In placing portfolio transactions, the Adviser seeks the best qualitative execution for the Fund, taking into account such factors as price (including the applicable brokerage commission or dealer spread), the execution capability, financial responsibility and responsiveness of the broker or dealer and the brokerage and research services provided by the broker or dealer. The Adviser generally seeks favorable prices and commission rates that are reasonable in relation to the benefits received.

The Adviser is specifically authorized to select brokers or dealers who also provide brokerage and research services to the Fund and/or the other accounts over which the Adviser exercises investment discretion and to pay such brokers or dealers a commission in excess of the commission another broker or dealer would charge if the Adviser determines in good faith that the commission is reasonable in relation to the value of the brokerage and research services provided. The determination may be viewed in terms of a particular transaction or the Adviser's overall responsibilities with respect to the Trust and to other accounts over which it exercises investment discretion. Research services include supplemental research, securities and economic analyses, statistical services and information with respect to the availability of securities or purchasers or sellers of securities and analyses of reports concerning performance of accounts.

The research services and other information furnished by brokers through whom the Fund effects securities transactions may also be used by the Adviser in servicing all of its accounts. Similarly, research and information provided by brokers or dealers serving other clients may be useful to the Adviser in connection with its services to the Fund. Although research services and other information are useful to the Fund and the Adviser, it is not possible to place a dollar value on the research and other information received. During the fiscal year ended September 30, 2019, FCI, as former investment adviser to the Fund, directed the following amounts in brokerage transactions to brokers on the basis of research services provided by such brokers to the Fund:

Total Transactions	Total Commissions
\$87,049	\$450

Over-the-counter transactions may be placed with broker-dealers if the Adviser is able to obtain best execution (including commissions and price). Over-the-counter transactions may also be placed directly with principal market makers. Fixed income securities are normally purchased directly from the issuer, an underwriter or a market maker. Purchases include a concession paid by the issuer to the underwriter and the purchase price paid to a market maker may include the spread between the bid and asked prices.

The following table provides information regarding brokerage commissions paid by the Fund during the fiscal years indicated.

Fiscal Year Ended	Brokerage Commissions Paid
September 30, 2019	\$ 450
September 30, 2018	\$ 150
September 30, 2017	\$ 0

The Trust and the Adviser have each adopted a Code of Ethics (the “Codes”) pursuant to Rule 17j-1 of the 1940 Act, and the Adviser’s Code of Ethics also conforms to Rule 204A-1 under the Investment Advisers Act of 1940, as amended. The personnel subject to the Codes are permitted to invest in securities, including securities that may be purchased or held by the Fund. You may obtain a copy of the Codes from the Fund or the Adviser, free of charge, by calling the Fund at 1-877-627-8504. You may also obtain copies of the Trust’s Code from documents filed with the SEC and available on the SEC’s web site at www.sec.gov.

DISCLOSURE OF PORTFOLIO HOLDINGS

The Fund’s Trustees have adopted policies with respect to the disclosure of the Fund’s portfolio holdings. These policies generally prohibit the disclosure of information about the Fund’s portfolio to third-parties prior to the day after the information is posted to a public website which may be the SEC’s EDGAR system. As described below, the policies allow for disclosure of non-public portfolio information to third-parties only if there is a legitimate business purpose for the disclosure. In addition, the policies require that the party receiving the portfolio holdings information execute a non-disclosure agreement that includes a prohibition on trading based on the information, unless the party is already subject to a duty of confidentiality (as determined by the Trust’s Chief Compliance Officer). Any arrangement to disclose non-public information about the Fund’s portfolio must be approved by the Trust’s Chief Compliance Officer. The Trust and the Adviser are prohibited from receiving compensation or other consideration in connection with disclosing information about the Fund’s portfolio to third parties.

Under the Trust’s policies, the Adviser is permitted to include Fund portfolio information that has already been made public through the Fund’s website or SEC filing in marketing literature and other communications to shareholders or other parties, provided, that, in the case of portfolio information made public solely through the Fund’s website, the information is disclosed no earlier than the day after the date of posting to the website.

The Fund releases non-public portfolio holdings information to certain third-party service providers on a daily basis in order for those parties to perform their duties on behalf of the Fund. These service providers include the Adviser, Distributor, Transfer Agent, Fund Accounting Agent, Administrator and Custodian. The Fund also periodically discloses portfolio holdings information on a confidential basis to other parties that provide services to the Fund, such as the Fund’s auditors, legal counsel, proxy voting services (if applicable), printers, brokers and pricing services. The lag between the date of the information and the date on which the information is disclosed will vary based on the nature of the services provided by the party to whom the information is disclosed. For example, the information may be provided to the Fund’s auditors within days after the end of the Fund’s fiscal year in connection with the Fund’s annual audit, while the information may be given to legal counsel at any time. Fund service providers are required to keep this information confidential and are prohibited from trading based on the information or otherwise using the information except as necessary in providing services to the Fund.

The Fund may also disclose non-public portfolio holdings information to rating and ranking organizations, such as Morningstar Inc. and Lipper Inc., in connection with those firms' research on and classification of the Fund and in order to gather information about how the Fund's attributes (such as performance, volatility and expenses) compare to peer funds. In these instances, information about the Fund's portfolio would be supplied within approximately 25 days after the end of the month. In addition, any such ratings organization would be required to keep the Fund's portfolio information confidential and would be prohibited from trading based on the information or otherwise using the information except as necessary.

DISTRIBUTION PLAN

The Trust, with respect to the Fund, has adopted a Distribution Plan (the "Plan") pursuant to Rule 12b-1 under the 1940 Act. The Plan was approved by a majority of the Board, including a majority of the Trustees who are not interested persons of the Trust or the Fund, and who have no direct or indirect financial interest in the operation of the Plan or in any other Rule 12b-1 agreement, cast in person at a meeting on June 13, 2005 called for the purpose of, among other things, voting on such Plan.

The Plan provides that the Fund will pay the Adviser and/or any registered securities dealer, financial institution or any other person (a "Recipient") a shareholder servicing fee aggregating to 0.25% of the average daily net assets of the Fund in connection with the promotion and distribution of Fund shares or the provision of personal services to shareholders, including, but not necessarily limited to, advertising, compensation to underwriters, dealers and selling personnel, the printing and mailing of prospectuses to other than current Fund shareholders, the printing and mailing of sales literature and servicing shareholder accounts. The Fund and/or the Adviser may pay all or a portion of these fees to any Recipient who renders assistance in distributing or promoting the sale of shares, or who provides certain shareholder services, pursuant to a written agreement. The Plan is a compensation plan, which means that compensation is provided regardless of 12b-1 expenses actually incurred. It is anticipated that the Plan will benefit the Fund's shareholders because an effective sales program typically is necessary in order for the Fund to reach and maintain a sufficient size to achieve efficiently its investment objectives and to realize economies of scale. The Trustees also expect that the Plan will significantly enhance the Fund's ability to distribute its shares. The Fund has not implemented the Plan, although the Fund may do so at any time upon 60 days' notice to shareholders.

PROXY VOTING POLICY

The Trust and the Fund's Adviser each have adopted proxy voting policies and procedures reasonably designed to ensure that proxies are voted in shareholders' best interests. As a brief summary, the Trust's policy delegates responsibility regarding proxy voting to the Adviser, subject to the Adviser's proxy voting policy and the supervision of the Board. The Adviser's policy provides that generally the Adviser will vote with management for routine corporate proposals unless such a vote is not in the shareholders' best interests. Non-routine votes are reviewed on a case-by-case basis.

The Trust's policy provides that, if a conflict of interest between the Adviser or its affiliates and the Fund arises with respect to any proxy, the Adviser must disclose the conflict to the Board and vote the proxy in accordance with the Board's instructions. The Board shall make the proxy voting decision that in its judgment, after reviewing the recommendation of the Adviser, is most consistent with the Adviser's proxy voting policies and in the best interests of the Fund's shareholders. When the Board is required to make a proxy voting decision, only the Trustees without a conflict of interest with regard to the security in question or the matter to be voted upon shall be permitted to participate in the decision of how the Fund's vote will be cast.

You may obtain a copy of the Trust's and the Adviser's proxy voting policy by calling Shareholder Services at 1-877-627-8504, or by writing to Ultimus Fund Solutions, LLC, the Fund's transfer agent, at 225 Pictoria Drive, Suite 450, Cincinnati, Ohio 45246, Attn: Unified Series Trust Chief Compliance Officer. A copy of the policies will be mailed to you within three days of receipt of your request. You also may obtain a copy of the policies from Fund documents filed with the SEC, which are available on the SEC's web site. A copy of the votes cast by the Fund with respect to portfolio securities during the most recent 12-month period ended June 30th, will be filed by the Fund with the SEC on Form N-PX. The Fund's proxy voting record will be available to shareholders free of charge upon request by calling or writing the Fund as described above or from the SEC's web site.

DETERMINATION OF NET ASSET VALUE

The net asset value (“NAV”) of the shares of the Fund is determined as of the close of trading (normally 4:00 p.m., Eastern Time) on each day the NYSE is open for trading. The NYSE is closed on Saturdays, Sundays and the following holidays: New Year’s Day, Martin Luther King, Jr. Day, Presidents’ Day, Good Friday, Memorial Day, Independence Day, Labor Day, Thanksgiving and Christmas. For a description of the methods used to determine the NAV (share price), see “Determination of Net Asset Value” in the Prospectus. The Fund’s NAV per share is computed by dividing the value of the securities held by the Fund plus any cash or other assets (including interest and dividends accrued but not yet received) minus all liabilities (including accrued expenses) by the total number of shares in the Fund outstanding at such time.

Equity securities generally are valued by using market quotations. Equity securities traded on a securities exchange for which a last-quoted sales price is readily available are generally valued at the last quoted sale price as reported by the primary exchange on which the securities are listed. Lacking a last sale price, an exchange traded security is generally valued by the pricing service at its last bid price. Securities listed on the NASDAQ National Market System are generally valued by a pricing service at the NASDAQ Official Closing Price, which may differ from the last sales price reported.

Options traded on major exchanges are valued at the last quoted sales price on their primary exchange. If there is no reported sale on the valuation date, such options are valued at the mean of the last bid and ask prices.

Fixed income securities for which market quotations are readily available are generally valued based upon the mean of the last bid and ask prices as provided by an independent pricing service. If market quotations are not readily available, the pricing service may use electronic data processing techniques and/or a computerized matrix system based on yield spreads relating to securities with similar characteristics to determine prices for normal institutional-size trading units of debt securities without regard to sale or bid prices to determine valuations. In determining the value of a bond or other fixed income security, matrix pricing takes into consideration recent transactions, yield, liquidity, risk, credit quality, coupon, maturity and type of issue, and any other factors or market data as the independent pricing service deems relevant for the security being priced and for other securities with similar characteristics.

If management or the Adviser considers a valuation unreliable due to market or other events (including events that occur after the close of trading but before the calculation of the NAV), the Fund will value its securities at their fair value, as of the close of the regular trading on the NYSE, as determined in good faith by the Adviser, in conformity with guidelines adopted by and subject to review of the Board. The Trust maintains a pricing review committee that will review any fair value provided by the Adviser, subject to the ultimate review and approval of the Pricing & Liquidity Committee of the Board. Any one member of the Pricing & Liquidity Committee constitutes a quorum for purposes of reviewing and approving a fair value. The full Pricing & Liquidity Committee will review all fair valued securities on a quarterly basis.

Short-term investments in fixed income securities with maturities of less than 60 days when acquired, or which subsequently are within 60 days of maturity, are valued at their market value as determined by an independent third-party pricing agent, unless it is determined that such practice does not approximate fair market value.

REDEMPTION IN-KIND

The Fund does not intend to redeem shares in any form except cash. However, if the amount you are redeeming is over the lesser of \$250,000 or 1% of the Fund’s NAV, pursuant to an election filed by the Trust under Rule 18f-1 of the 1940 Act, the Fund has the right to redeem your shares by giving you the amount that exceeds the lesser of \$250,000 or 1% of the Fund’s NAV in securities instead of cash. In the event that an in-kind distribution is made, a shareholder may incur additional expenses, such as the payment of brokerage commissions, on the sale or other disposition of the securities received from the Fund.

STATUS AND TAXATION OF THE FUND

The Fund was organized as a series of a business trust, and intends to continue to qualify for treatment as a regulated investment company (a “RIC”) under the Internal Revenue Code of 1986, as amended (the “Code”) in each taxable year. There can be no assurance that it actually will so qualify. If the Fund qualifies as a RIC, its dividend and capital gain distributions generally are subject only to a single level of taxation, to the shareholders. This differs from distributions of a regular business corporation which, in general, are taxed first as taxable income of the distributing corporation, and then again as dividend income of the shareholder.

Redemption of Fund shares generally will result in a taxable gain or loss to the redeeming shareholder, depending on whether the redemption proceeds are more or less than the shareholder’s adjusted basis for the redeemed shares.

If the Fund does qualify as a RIC but (in a particular calendar year) distributes less than 98% of its ordinary income and 98.2% of its capital gain net income (as the Code defines each such term), the Fund would be subject to an excise tax. The excise tax, if applicable, is 4% of the excess of the amount required to have been distributed over the amount actually distributed for the applicable year. If the Fund does not qualify as a RIC, its income will be subject to taxation as a regular business corporation, without reduction by dividends paid to shareholders of the Fund.

To continue to qualify for treatment as a RIC under Subchapter M of the Code, the Fund must, among other requirements:

- Derive at least 90% of its gross income each taxable year from dividends, interest, payments with respect to securities loans, gains from the sale or other disposition of stock or securities or foreign currencies, and certain other income (including gains from options, futures, or forward contracts derived with respect to the RIC’s business of investing in stock, securities, or foreign currencies) (the “Income Requirement”);
- Diversify its investments in securities within certain statutory limits; and
- Distribute annually to its shareholders at least 90% of its investment company taxable income (generally, taxable net investment income less net capital gain) (the “Distribution Requirement”).

The Fund may acquire zero coupon bonds or other securities issued with original issue discount (including pay-in-kind securities). If it does so, the Fund will have to include in its income its share of the original issue discount that accrues on the securities during the taxable year, even if the Fund receives no corresponding payment on the securities during the year. Because the Fund annually must distribute (a) 98% of its ordinary income in order to avoid imposition of a 4% excise tax, and (b) 90% of its investment company taxable income, including any original issue discount, to satisfy the Distribution Requirement, the Fund may be required in a particular year to distribute as a dividend an amount that is greater than the total amount of cash it actually receives. Those distributions would be made from the Fund’s cash, if any, or from the sales of portfolio securities, if necessary. The Fund might realize capital gains or losses from any such sales, which would increase or decrease the Fund’s investment company taxable income and/or net capital gain (the excess of net long-term capital gain over net short-term capital loss).

Hedging strategies, to reduce risk in various ways, are subject to complex rules that determine for federal income tax purposes, the character and time for recognition of gains and losses the Fund realizes in connection with the hedge. The Fund’s income from options, futures, and forward contracts, if any, in each case derived with respect to its business of investing in stock, securities, or foreign currencies, should qualify as allowable income for the Fund under the Income Requirement.

The Fund’s net realized capital gains from securities transactions will be distributed only after reducing such gains by the amount of any available capital loss carryforwards. Net capital losses recognized in taxable years of the Fund beginning after December 31, 2010 may be carried forward indefinitely to offset any capital gains. As of September 30, 2019, the Fund had short-term and long-term capital loss carryforwards available to offset future gains and not subject to expiration in the amount of \$87,352 and \$302,767 respectively.

Capital losses and specified gains realized after October 31, and net investment losses realized after December 31 of the Fund’s fiscal year may be deferred and treated as occurring on the first business day of the following fiscal year for tax purposes. For the fiscal year ended September 30, 2019, the Fund did not defer any late year gains or losses.

Based on the number of shareholders, the Fund could be considered to be a personal holding company (a “PHC”) under the Internal Revenue Code. An entity is considered a PHC if: (1) at least 60% of its income is derived from certain types of passive income (e.g., interest, dividends, rents and royalties) and (2) at any time during the last half of the taxable year more than 50% in value of its outstanding stock is owned directly or indirectly by or for not more than 5 individuals. If the Fund is deemed a PHC, its undistributed personal holding company income (“UPHCI”) will be taxed at 20%. UPHCI is computed by making certain adjustments to taxable income, including a downward adjustment for distributions made to shareholders during the taxable year.

The tax on UPHCI is in addition to any other tax imposed on the Fund and/or its distributions. Under the Code, a regulated investment company, such as the Fund, that is also a PHC is also taxed on any undistributed investment company taxable income at the highest corporate rate under the Code.

Fund distributions received by your qualified retirement plan, such as a 401(k) plan or IRA, are generally tax-deferred; this means that you are not required to report Fund distributions on your income tax return when paid to your plan, but, rather, when your plan makes payments to you or your beneficiary. Special rules apply to payouts from Roth and Education IRAs.

The portion of the dividends the Fund pays (other than capital gain distributions) that does not exceed the aggregate dividends it receives from U.S. corporations will be eligible for the dividends received deduction allowed to corporations.

If you are a non-retirement plan holder, the Fund will send you a Form 1099 each year that tells you the amount of distributions you received for the prior calendar year, the tax status of those distributions, and a list of reportable sale transactions. Generally, the Fund’s distributions are taxable to you in the year you received them. However, any dividends that are declared in October, November or December but paid in January are taxable as if received in December of the year they are declared. Investors should be careful to consider the tax consequences of buying shares shortly before a distribution. The price of shares purchased at that time may reflect the amount of the anticipated distribution. However, any such distribution will be taxable to the purchaser of the shares and may result in a decline in the share value by the amount of the distribution.

If shares of the Fund are purchased within 30 days before or after redeeming other shares of the Fund at a loss, all or a portion of that loss will not be deductible and will increase the basis of the newly purchased shares. If shares of the Fund are sold at a loss after being held by a shareholder for six-months or less, the loss will be treated as long-term, instead of short-term, capital loss to the extent of any capital gain distributions received on the shares.

The foregoing is only a summary of some of the important federal income tax considerations affecting the Fund and its shareholders and is not intended as a substitute for careful tax planning. **Accordingly, prospective investors should consult their own tax professionals for more detailed information regarding the above and for information regarding federal, state, local and foreign taxes.**

CUSTODIAN

Huntington National Bank, located at 41 South High Street, Columbus, Ohio 43215, is Custodian of the Fund’s investments. The Custodian acts as the Fund’s depository, safekeeps its portfolio securities, collects all income and other payments with respect thereto, disburses funds at the Fund’s request and maintains records in connection with its duties. A Trustee of the Trust is a member of management of the Custodian.

FUND SERVICES

Ultimus, located at 225 Pictoria Drive, Suite 450, Cincinnati, Ohio 45246, acts as the Fund’s transfer agent, fund accountant, administrator and dividend disbursing agent. Certain officers of the Trust are officers, employees, and/or members of management of Ultimus, the parent company of the Distributor.

Ultimus maintains the records of each shareholder’s account, answers shareholders’ inquiries concerning their accounts, processes purchases and redemptions of the Fund’s shares, acts as dividend and distribution disbursing agent and performs other transfer agent and shareholder service functions. In addition, Ultimus provides the Fund with fund accounting services, which includes certain monthly reports, record keeping and other management-related services. Ultimus also provides the Fund with administrative services, including all regulatory reporting and necessary office equipment, personnel and facilities.

The following tables set forth the amounts paid by the Fund to Ultimus for its transfer agency, fund accounting and fund administration services for the fiscal years indicated. The amounts given include reimbursement for various out-of-pocket expenses, and may include amounts paid to various third parties as compensation for sub-transfer agency services.

	Fiscal Year Ended September 30, 2017	Fiscal Year Ended September 30, 2018	Fiscal Year Ended September 30, 2019
Transfer Agent Fees	\$ 15,000	\$ 14,250	\$ 12,000
Fund Accounting Fees	\$ 20,044	\$ 22,227	\$ 28,647
Administration Fees	\$ 31,268	\$ 31,692	\$ 30,000

INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

The firm of Cohen & Company, Ltd., located at 1350 Euclid Avenue, Suite 800, Cleveland, Ohio, 44115 has been selected as the Independent Registered Public Accounting Firm for the Fund for the fiscal years ending September 30, 2020 and September 30, 2021. Cohen & Company, Ltd. will perform an annual audit of the Fund’s financial statements and will provide financial, tax and accounting services as requested.

DISTRIBUTOR

Ultimus Fund Distributors, LLC, (the “Distributor”), located at 225 Pictoria Drive, Suite 450, Cincinnati, Ohio 45246, is the exclusive agent for distribution of shares of the Fund. An officer of the Trust is an officer of the Distributor, and may be deemed to be an affiliate of the Distributor. The Distributor is a wholly-owned subsidiary of Ultimus.

The Distributor is obligated to sell the shares of the Fund on a best efforts basis only against purchase orders for the shares. Shares of the Fund are offered to the public on a continuous basis.

FINANCIAL STATEMENTS

The financial statements of the Fund and the report of the Independent Registered Public Accounting Firm required to be included in this SAI are incorporated herein by reference to the Fund’s [Annual Report](#) to Shareholders for the fiscal year ended September 30, 2019. (File No. 811-21237). The Annual Report may be obtained, without charge, by calling Shareholder Services at 1-877-627-8504.

APPENDIX

Standard & Poor's Corporate Bond Rating Definitions

AAA-Debt rated "AAA" has the highest rating assigned by S&P. Capacity to pay interest and repay principal is extremely strong.

AA-Debt rated "AA" has a very strong capacity to pay interest and repay principal and differs from the higher-rated issues only in small degree.

A-Debt rated "A" has a strong capacity to pay interest and repay principal, although it is somewhat more susceptible to the adverse effects of changes in circumstances and economic conditions than debt in higher-rated categories.

BBB-Debt rated "BBB" is regarded as having an adequate capacity to pay interest and repay principal. Whereas it normally exhibits adequate protection parameters, adverse economic conditions or changing circumstances are more likely to lead to a weakened capacity to pay interest and repay principal for debt in this category than in higher-rated categories.

BB, B, CCC, CC-Debt rated "BB", "B", "CCC", and "CC" is regarded, on balance, as predominantly speculative with respect to capacity to pay interest and repay principal in accordance with the terms of the obligation. "BB" indicates the lowest degree of speculation and "CC" the highest degree of speculation. While such debt will likely have some quality and protective characteristics, these are outweighed by large uncertainties of major risk exposures to adverse conditions.

CI-The rating "CP" is reserved for income bonds on which no interest is being paid.

D-Debt rated "D" is in default, and payment of interest and/or repayment of principal is in arrears.

Moody's Investors Service, Inc. Corporate Bond Rating Definitions

Aaa-Bonds which are rated "Aaa" are judged to be of the best quality. They carry the smallest degree of investment risk and are generally referred to as "gilt edged." Interest payments are protected by a large or an exceptionally stable margin and principal is secure. While the various protective elements are likely to change, such changes as can be visualized are most unlikely to impair the fundamentally strong position of such issues.

Aa-Bonds which are rated "Aa" are judged to be of high quality by all standards. Together with the Aaa group, they comprise what are generally known as high-grade bonds. They are rated lower than the best bonds because margins of protection may not be as large as in Aaa securities or fluctuation of protective elements may be of greater amplitude or there may be other elements present that make the long-term risks appear somewhat larger than in Aaa securities.

A-Bonds which are rated "A" possess many favorable investment attributes and are to be considered as upper medium-grade obligations. Factors giving security to principal and interest are considered adequate but elements may be present which suggest a susceptibility to impairment sometime in the near future.

Baa-Bonds which are rated "Baa" are considered as medium-grade obligations (i.e., they are neither highly protected nor poorly secured). Interest payments and principal security appear adequate for the present but certain protective elements may be lacking or may be characteristically unreliable over any great length of time. Such bonds lack outstanding investment characteristics and, in fact, have speculative characteristics as well.

Ba-Bonds which are "Ba" are judged to have speculative elements; their future cannot be considered well assured. Often the protection of interest and principal payments may be very moderate and thereby not well safeguarded during both good and bad times over the future. Uncertainty of position characterizes bonds in this class.

B-Bonds which are rated “B” generally lack characteristics of a desirable investment. Assurance of interest and principal payments or of maintenance of other terms of the contract over any long period of time may be small.

Caa-Bonds which are rated “Caa” are of poor standing. Such issues may be in default or there may be present elements of danger with respect to principal or interest.

Ca-Bonds which are “Ca” represent obligations which are speculative in a high degree. Such issues are often in default or have other marked shortcomings.

C-Bonds which are rated “C” are the lowest rated class of bonds, and issues so rated can be regarded as having extremely poor prospects of ever attaining any real investment standing.

Fitch Investors Service, Inc. Bond Rating Definitions

AAA-Bonds considered to be investment grade and of the highest credit quality. The obligor has an exceptionally strong ability to pay interest and repay principal, which is unlikely to be affected by reasonably foreseeable events.

AA-Bonds considered to be investment grade and of very high credit quality. The obligor’s ability to pay interest and repay principal is very strong, although not quite as strong as bonds rated “AAA.” Because bonds rated in the “AAA” and “AA” categories are not significantly vulnerable to foreseeable future developments, short-term debt of these issuers is generally rated “F-1+.”

A-Bonds considered to be investment grade and of high credit quality. The obligor’s ability to pay interest and repay principal is considered strong, but may be more vulnerable to adverse changes in economic conditions and circumstances than bonds with higher ratings.

BBB-Bonds considered to be investment grade and of satisfactory credit quality. The obligor’s ability to pay interest and repay principal is considered to be adequate. Adverse changes in economic conditions and circumstances, however, are more likely to have adverse impact on these bonds, and therefore impair timely payment. The likelihood that the ratings of these bonds will fall below investment grade is higher than for bonds with higher ratings.

BB-Bonds are considered speculative. The obligor’s ability to pay interest and repay principal may be affected over time by adverse economic changes. However, business and financial alternatives can be identified which could assist the obligor in satisfying its debt service requirements.

B-Bonds are considered highly speculative. While bonds in this class are currently meeting debt service requirements, the probability of continued timely payment of principal and interest reflects the obligor’s limited margin of safety and the need for reasonable business and economic activity throughout the life of the issue.

CCC-Bonds have certain identifiable characteristics which, if not remedied, may lead to default. The ability to meet obligations requires an advantageous business and economic environment.

CC-Bonds are minimally protected. Default in payment of interest and/or principal seems probable over time.

C-Bonds are in imminent default in payment of interest or principal.

DDD, DD, and D-Bonds are in default on interest and/or principal payments. Such bonds are extremely speculative and should be valued on the basis of their ultimate recovery value in liquidation or reorganization of the obligor. “DDD” represents the highest potential for recovery on these bonds, and “D” represents the lowest potential for recovery.
